

A TOUCH OF CLASS

Touchscreen control for your security system

A keypad that will fit nicely into your home or office décor as well as your life-style. From its elegant display, to an intuitive, animated graphical interface, to its simplicity of operation with scrolling capabilities. The DMP Graphic Touchscreen keypad is what you expect from today's security systems. Also available in wireless.

Screen Turns Red in Alarm

LT-1311 09/14

Features

- 1/2 inch slim profile in glossy black or white finish.
- Big, bright, 5-inch full-color display.
- Interactive shield makes one button arming.
- Intuitive icons guide you through system functions.
- Press the mini shield in the top left to return to the main screen at any point.

Arming/Disarming Shield Icon

The Interactive Shield displays current system status. Press and hold to arm the system or tap the shield to select an arming option.

Home/Sleep/Away

Panic Menu

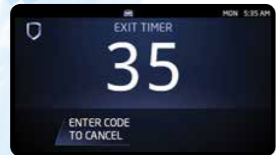

All/Perim

Area

Exit Timer

Tap the Panic feature on the carousel. The Panic screen will appear. Then press and hold the appropriate panic icon until it illuminates.

To notify you of time remaining before system arms = time to exit.

Visual Warning of an Alarm

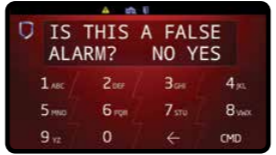

The Interactive Shield changes to red to warn you that an alarm has occurred, even if it happened while you were gone and the siren has been silenced.

Home Shield

The mini shield is in the top left corner on every menu screen and provides navigation back to the main screen. Tap on the shield in any menu of the keypad and it will take you to the Main Screen menu.

Verifying an Alarm

In the event of an alarm, the **FALSE ALARM QUESTION** feature lets you instantly cancel false alarms or verify real emergencies and summon help more quickly.

Weather

A glance at the main screen shows animated icons of current weather and tomorrow's forecast.

Attention List

Scroll through list to see history on system activity.

Armed LED
