

Powerful... Durable... Exceptionally Smart

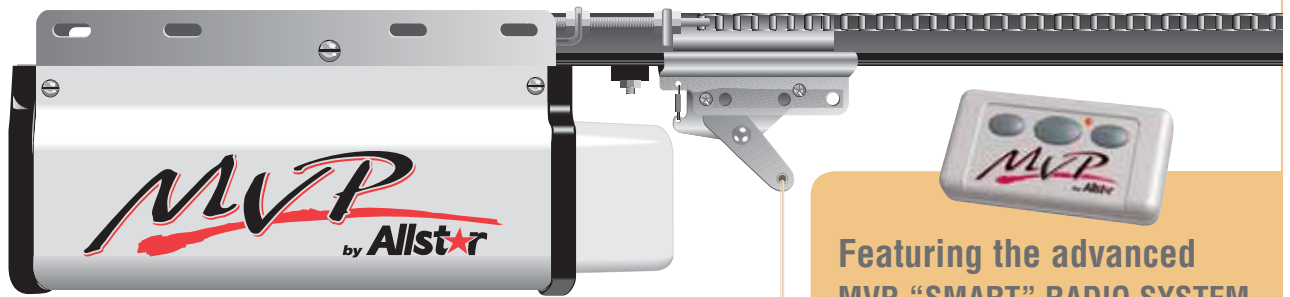

ADVANTAGE Allstar MVP

And our MVP is guaranteed for 20 years.

We're widely known for the quality, performance and ruggedness of our garage door openers. But we can confidently say that the MVP is the toughest and smartest we've ever made. The MVP is ready to take on any challenge, even carriage house doors, and offers the industry's best drive train warranty, a full 20 years. That's a promise we can make because it's a promise we can keep.

BEST VALUE feature rich

Featuring the advanced MVP "SMART" RADIO SYSTEM

RELIABILITY

We make the Best!

Quality-Built to be a Star Performer Season After Season

UNDER THE COVER_ superior quality

20-YEAR DRIVE TRAIN WARRANTY

- **V-Belt-Drive™ System:** Far more durable than the plastic gear sets used in most garage door openers. The V-belt and shock-absorbing door arm cushion the sudden starts and stops of typical use, protecting the opener and door.
- **Quiet Operation:** A precision machined, cast alloy drive pulley and the V-belt primary drive dramatically dampen vibration and noise.
- **MVP Smart Circuitry:** The MVP is fully capable of accepting coded signals from multiple transmitters and wireless keypads. It also monitors every critical opener function every time your door opens or closes. Easily programmable from floor level.
- **True 1/2 HP Motor** - Not just "1/2 HP rated." Our powerful motors don't have to work so hard so they last.

MOTOR

- 1/2 Horsepower
- Thermally protected
- For sectional or 1-piece doors

CHASSIS & DRIVE

- All steel chassis
- Solid, one-piece T-rail
- All Steel trolley
- V-Belt/Roller Chain Drive

5-WAY SAFETY SYSTEM

- SafeFinish™ photosystem
- Built-in sensing system
- Maximum run timer
- Smart light
- Manual disconnect

ELECTRICAL SYSTEM

- U.L. listed (US & Canada)
- 115 VAC
- 4.5-minute lamp time delay
- Lamp fixture rated to 75W

RADIO CONTROLS

- High-performance receiver
- MVP 3-button transmitter with multi-door capability
- Super Station wall control
- Optional Keyless Entry control

WARRANTIES

- Drive system: 20 years
- Electronics: 2 years

Super Station Wall Control

Features a vacation switch with lock-out, illuminated three-button "open-close-stop" control, an independent light control, and a button for programming radio controls.

Quik-Code™ Radio Control

Stylish, three-button transmitter with a full range of functions built-in. Quik-Code™

technology allows push button programming, with no tiny switches to set. Will operate multiple doors and gates.

SafeFinish™ Photo System

Detects obstructions in the door's path and reverses downward travel before contact is made.

For qualified, professional installation, see your local Allstar Dealer.

For complete information on the full line of Allstar residential and commercial overhead door and gate controls, visit us online at: www.allstarcorp.com

And, for the ultimate in quiet operation, try the MVP Super-Belt with *Total Belt Drive*.

Specifications described on this sheet are subject to change without notice. Please consult your Allstar dealer for the latest product specifications and information.
