Dolphin® 99EXni mobile computers are certified equipment for use in potentially explosive atmospheres including chemical, oil and gas, life sciences and utilities. Moreover, the 99EXni provides user-friendly ergonomics, cutting-edge wireless technology, multi-functional data capture and extreme durability.

The reliable and intuitive Dolphin 99EXni delivers an outstanding feature set that enables improved productivity for mobile workers. Integrated Shift-PLUS™ technology provides all day battery life, minimizing the time and expense incurred when batteries need to be charged or replaced. The Dolphin 99EXni is IP67-rated and can withstand multiple 6 feet (1.8 meters) drops to concrete, ensuring years of trouble-free operation.

The 99EXni features the latest in wireless technology, including a software-definable radio that allows on-the-fly switching between GSM and CDMA networks, leading to improved network coverage and lower costs related to device provisioning and deployment. Additionally, built-in Wi-Fi provides workers with access to critical data using the new, lightning fast 802.11n standard while still supporting legacy a/b/g protocols.

Integrated motion, light and proximity sensors help conserve battery life and improve ease of use by automatically optimizing the offering for the current environment. Similarly, multiple keypad options are available to ensure that the device is configured to meet diverse data input needs. With additional features such as an ultra-bright 3.7 inch display that can be read, even in direct sunlight, the Dolphin 99EXni offers superior usability.

Extremely reliable, well designed, and full-featured, the Dolphin 99EXni is the right choice for use in hazardous locations where real-time information processing and solution reliability is critical to a company's operation.
