KSI SmartTag SAM

Tamper-Evident SmartTags

SmartKey Cover

The KSI SmartTag Security Asset Manager (SAM) is one of the most flexible and highest density storage solutions for automatically auditing and controlling access to your valuable keys and small assets. Attach your keys to our red Tamper-Evident SmartTags or optional SmartKey Covers, each of which has a unique electronic ID that can be read by our SAM, enabling you to return assets to any open position within your SmartTag SAM System.

This superior flexibility enables you to quickly organize your assets by assigning one or more asset positions to a given user or group of users without the need for programming. Each panel has a dry erase finish for easy labeling of positions.

Assets and keys are secured in our 16-gauge SmartTag SAM box. Access to the box is gained through entry of a PIN or use of optional card or biometric readers. Once user identification is accepted, the SAM door opens. All asset removals and returns are automatically logged to the authorized user.
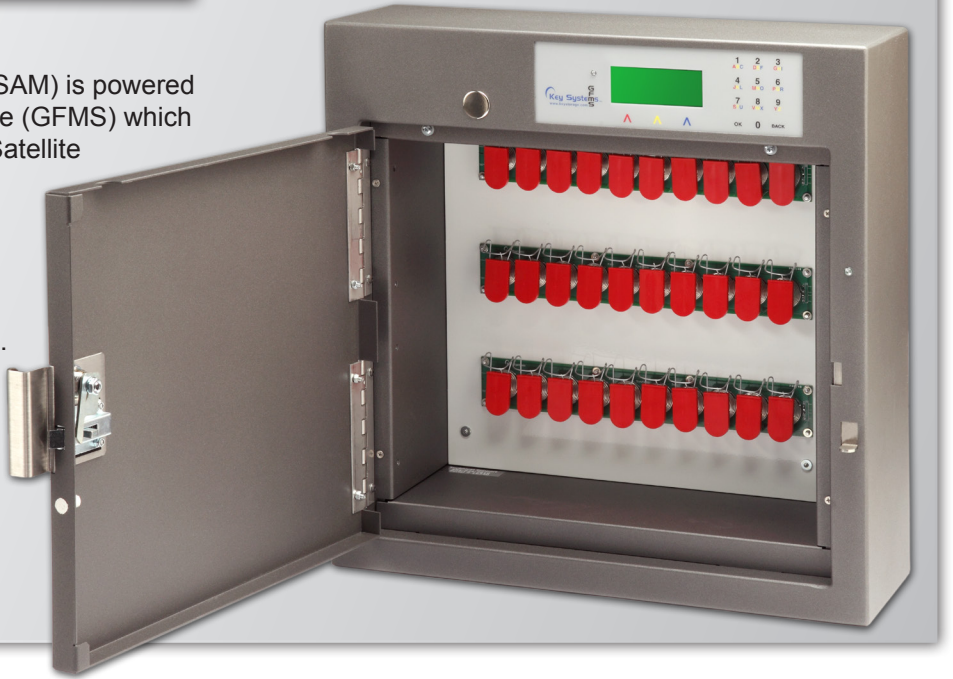

The KSI SmartTag Security Asset Manager (SAM) is powered by our Global Facilities Management Software (GFMS) which can also network with other KSI SAMs, KSI Satellite controllers, or your own asset management system. Each SmartTag is tracked by a unique electronic serial number. GFMS software provides many functions, including live monitoring of SAM status and user activity, reports, alarm alerts, and much more.

This SAM is compatible with many identification devices, including biometric hand, fingerprint, and optical scanners, as well as magnetic stripe, proximity and assorted card/tag readers.

KSI SmartTag Panels

For a large scale solution, we can install KSI SmartTag Panels in one or more of your rooms. Your room takes the place of our SAM box, while our KSI Satellite controls and tracks access to the room. Assets plugged into SmartTag Panels are monitored and tracked for authorized usage and accountability.

Global Facilities Management System

GFMS™ combines sophisticated and adaptable, web enabled, PC-based software with no client installs. System integration and custom application are cornerstones of our philosophy towards system management.

With our flexible solutions, you can use your computer, laptop, smartphone, or tablet to securely access your Key Systems, Inc. Security Asset Managers and GFMS software from any browser, without regard to operating system.

Key Systems, Inc. will help you formulate an asset management strategy specific to your facility's requirements, regardless of size, scope, and pre-existing technology.

SmartTag Capacity	W	H	D	Weight
30, 60, 90, or 120	18"	18"	6"	22 lbs.
50, 100, 150, or 200	18"	27⅛"	6"	30 lbs.
100, 200, 300, or 400	28⅛"	27⅛"	6"	42 lbs.
140, 280, 420, or 560	28⅛"	36"	6"	55 lbs.
