

The Food Processing Industry

Utilizing Fulton Steam Boilers and Thermal Fluid Heaters

Now You're Cooking...

Fulton has a long history of selling our steam boilers and thermal fluid heaters into food processing applications. The boilers and heaters are used to heat equipment such as heat ovens, fryers, belt grills, kettles and heat exchangers. Examples of common products include:

- Candies
- Jams
- Beverages (Beer & Soda)
- Canned goods
- Baked goods
- Fast Food Items: (chicken nuggets, bacon, breakfast entrees)
- Frozen Entrees Manufacturing
- "Clean in Place" Applications (CIP)

VMP80, 80 HP Steam Boiler:

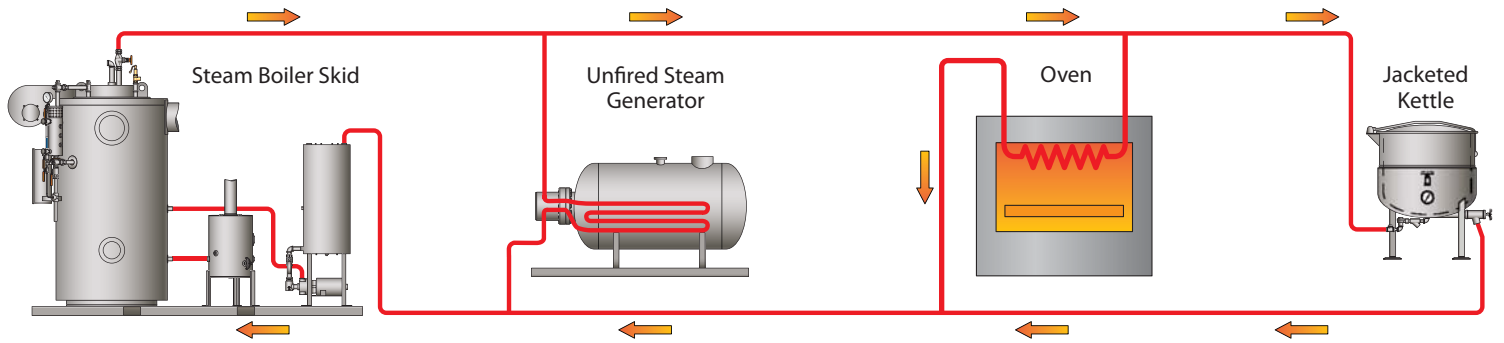

This skid package includes a Feed System, Blowdown Separator and Water Treatment. In addition, a Stainless Steel Unfired Steam Generator was incorporated to use RO / DI water for clean steam generation.

FT-0400C 4,000,000 BTU/Hr natural gas fired thermal fluid heater:

This package includes skid mounted redundant pumps as well as a pneumatic bypass valve and four 2-way control valves. The FT-1000L deaerator / thermal buffer / expansion tank is supplied loose for customer mounting.

Steam Systems

- **Vertical Units:** High or Low Pressure to 150 HP
- **Horizontal Units:** to 300 HP
- **Full Line of Accessories**
- **Customized:** Engineered skids for turnkey projects

Thermal Fluid Systems

- **Vertical Heaters:** to 14,000,000 Btu/hr
- **Horizontal Heaters:** to 12,000,000 Btu/hr
- **Customized:** Turnkey systems including control valves secondary loops and booster pumps
- **Unfired:** Steam or Hot Water Generators
