Integration

KSI's GFMS™ offers versatile options for integration with the systems your facility currently has in operation. We offer custom solutions for data sharing with existing employee databases, building access control and facilities monitoring systems.

Our GFMSIntegrator, GFMS Sync Tool and SAM XML API each offer unique features at varying levels of integration. All of these applications aim to increase security while saving time and costs for your administrative personnel.

YOUR EXISTING SYSTEM

Synchronize Scheduling Across Systems

Record Time and Attendance

Enforce Exit/Entry Controls

Reduce Administrative Time Through Automatic Employee Data Updates

Monitor Anti-Passback Violations

Alarm and Event Data Sharing

INTEGRATED PRODUCTS INCLUDE:

Lenel	OnGuard®

# GFMS Sync Tool & Third Party Applications

- Access Control
- Human Resources
- Exit Control
- Payroll
- Time & Attendance

Existing Database
Such As:

- Fire Systems
- Video Systems
- Building Management
- CRM
- Incident Reporting

GMFS Sync Tool is a versatile tool that sets up your GFMS assets - *keys, lockers, laptops, tools or anything you can control with GFMS* - for management through your existing system.

GFMS SYNC TOOL

- User Data
- Groups / Roles

GFMS Sync Tool automates the assignment of access to your assets and the updating of employee information, eliminating wasted time and administrative headaches.

Key Systems INC.®
www.keystorage.com
GFMS

GFMS Server

- Coordinate your existing scheduling and access tools with our Security Asset Managers

- Reduce administrative time while eliminating data entry errors

- Increase security by ensuring consistent data across your access control environment

- Enroll, update, and remove access to assets using your existing application

---

GFMSIntegrator

- Access Control
- Human Resources
- Exit Control
- Payroll
- Time & Attendance

Existing Database
Such As:

- Fire Systems
- Video Systems
- Building Management
- CRM
- Incident Reporting

GFMSIntegrator places complete management of you assets within your existing software system. View reports and event data in your system and program access to assets as well.

GFMS Integrator

- User Data
- Groups / Roles
- Asset Inventory
- Real Time Event Data

Key Systems, Inc. offers off-the-shelf solutions for a variety of products, such as Lenel OnGuard® and AMAG Symmetry, but GFMS Integrator makes end-user customization possible so you can tailor our products to fit your needs.

GFMS

GFMS Server

Work Station

- Real time event and alarm data sent to your existing system to support advanced features, such as anti-passback and exit control, as well as reporting and event processing of GFMS assets in your existing system.

- Complete programming control of user and access data

- Please contact us to explore how GFMSIntegrator can meet your integration needs

Such As:
- Reports
- Real Time Event Data
- Email / Text Messages
- Asset Inventory
- Asset Reservation
- Time Zones
- Timers
- Site Map
- Groups / Roles
- Rules Engine
- SAM Manager
- Biometrics
- Software Partitioning
- Encryption

Security Asset Manager XML API

Third Party Application

SAM XML API

- User Data
- Groups / Roles
- Time Zones
- Real-Time Event Data
- Rules Engine
- Asset Reservation

For developers, the SAM XML API offers the opportunity to completely control our Security Asset Managers through your custom application.

- SAM XML API is the platform through which developers may manage and control GFMS SAM devices

- A developer may choose to utilize SAM XML API if they wish GFMS software to not be part of their system

- The SAM XML API is also how GFMS software controls and manages the SAM
