

Celebrating 35 years of Innovative security management solutions

Sielox is proud to be celebrating its thirty-fifth anniversary in the security products industry. Our history began in 1979 as Sielox Systems based in Sunnyvale CA. Founded by technology legend France Rode, an engineer and inventor best known for his work on the HP-35 pocket calculator as one of the four lead engineers at Hewlett-Packard assigned to the project. Rode also invented and created the first workable RFID products: workplace entry cards, for which he holds several patents including 4,727,369 for Electronic lock and key system and RFID-based Security products.

U.S. Patent Feb. 21, 1988 Sheet 1 of 9 4,727,369

In 1986 Checkpoint Systems based in Thorofare NJ, primarily an RFID retail security manufacturer, acquired Sielox Systems and named the new division Access Control Products Group (ACPG). In 2006 the ACPG was sold to investors and the new public company was named Sielox Inc. as a tribute to its heritage and moved offices to Runnemede NJ. In December 2010 the company was purchased by Karen Evans and investors lead by Richard Hoel creating a private company. From its Silicon Valley beginnings through today, Sielox is essentially a 35 year old “startup,” creating and enhancing products and applications for end-users through value-added Business Partners.

The Sielox Core Products line is designed by Sielox engineers and manufactured in the USA. Sielox Pinnacle software and the 1700 controller have been developed to meet or exceed any user requirement from entry level to enterprise-wide systems. The marriage of advanced management software with an advanced controller from a single vendor has been a proven technology and application success since 1979. Built upon the Sielox access control innovation legacy of more than 35 years, Pinnacle 9® is a system design with multiple layers of scalable control and the 1700 controller is unmatched in capabilities and serviceability. With more than 250,000 controllers and tens of thousands of access control software systems installed since our start in Silicon Valley, Sielox continues to lead the industry with customer centric solutions, sales and technical support.

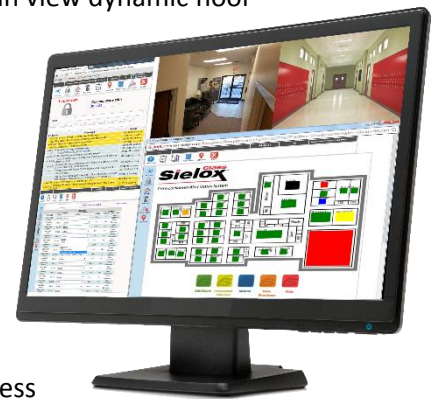

About

Released in 2013, Sielox Class - Crisis Lockdown Alert Status System was the recipient of both the *Security Products Magazine* and *Government Security News* New Crisis Management Product of the Year for 2013. Class™ provides critical situational awareness benefits to First Responders with real-time status updates to aid in response and deployment.

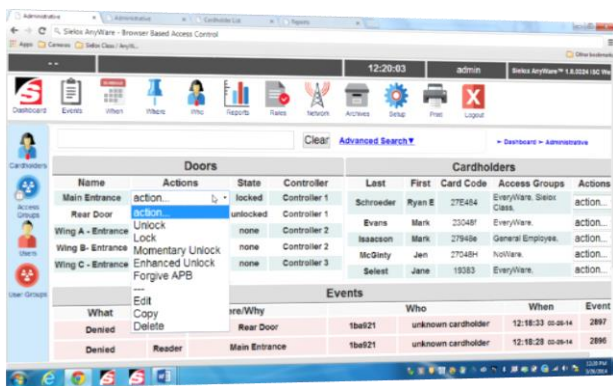

First Responders no longer walk blindly into harm's way with the knowledge obtained from the Sielox Class™ System and provides for timely accurate decisions. Educators send color-coded alerts to administrators and first responders through networked devices. Law enforcement and first responders can view dynamic floor plans in real-time, with accurate updates automatically displayed on their mobile phone, tablet or patrol car laptop.

Features include email and text alerts to authorities and responders, two-way chat between classroom and responders and interface to paging and mass notification systems via AC-1700 outputs to trigger preprogrammed announcements and messages.

Sielox AnyWare is our soon to be released plug-and-play, browser-based access control solution affordable to small and mid-sized organizations. In today's world, you need to control and manage your security requirements from your desktop, tablet or mobile device.

AnyWare allows you to easily deploy, manage and expand your access control requirements on the fly. Available in two configurations – AW 8 and AW 40 – AnyWare can manage the majority of access control applications with less than eight doors and is expandable to forty doors at a price point that makes sense. Using an IT-friendly network appliance, AnyWare is ready to configure in a matter of minutes.

Moving forward Sielox will continue to innovate and create value for our Business Partners and End Users.

About Sielox

Since 1979, Sielox has designed and marketed intuitive security management systems through a network of select business partners to a variety of end-users within commercial, education, financial, government, industrial, manufacturing and retail markets. From entry-level to enterprise-wide, Sielox scalable solutions exceed today's complex and demanding security environments. Headquartered in Runnemede, New Jersey, Sielox prides itself by providing "Made in USA" solutions.
