## DMC3-4 Music/Communication Retrofit System

The DMC's unique retrofit frames eliminate the need to repair drywall in most homes and are paintable to match any room décor.

Homes with intercom systems already in place can easily upgrade to the DMC3-4 Music/Communication Retrofit System from Linear.

The DMC3-4 is a full-function residential intercom and music distribution system that furnishes rich sound for music and voice throughout the home. It has the ability to communicate and monitor up to 15 rooms, and supplies digitally-tuned AM/FM radio to each of them.

### Simple Installation, No Demolition

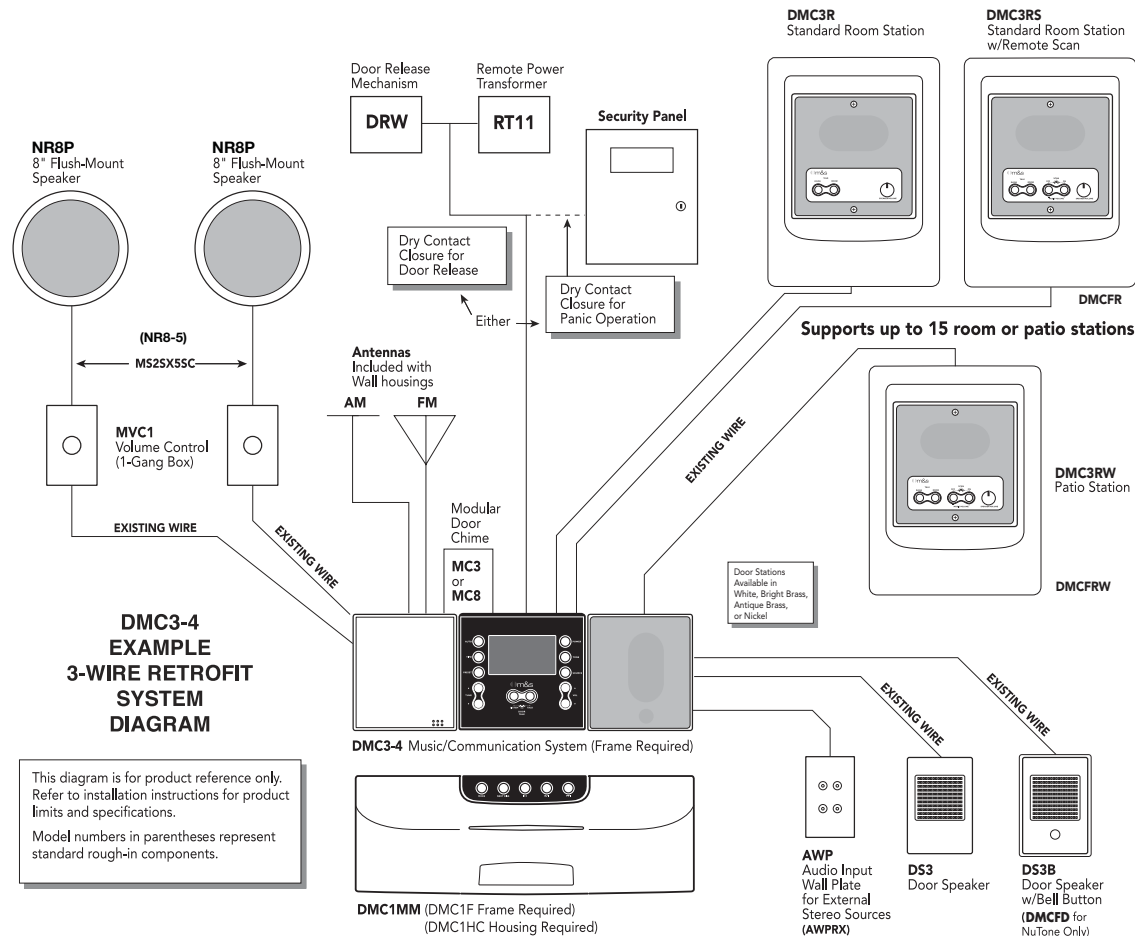

Because it connects to existing wires, this system can easily replace most older intercoms, including 3-wire or 4-wire M&S and NuTone systems, without the need to repair drywall.

### Digital Music

The DMC3-4 works with the optional DMC1 iPlay® Dock - MP3 & CD Player, which connects to all digital music sources, including MP3 players, smart phones and CD/MP3 disks. Customers requiring a multi-CD changer with their DMC3-4 can also opt for the DMC1CD 6-disc CD changer.
