LockIT™ Secure Connectivity System

The LockIT solution is comprised of two primary elements: the RJ45 Outlet/LC Adapter Lock and the Secure Patch Cord. The Lock protects a RJ45 copper outlet or LC fiber adapter from the insertion of cords or foreign objects. The Secure RJ45 Patch Cord deters unintended or unauthorized disconnection of the cord. Each of these components requires the LockIT universal key for removal, but may be freely inserted into an outlet to secure the connection. All LockIT components are brightly colored in yellow to easily identify secured connectivity.

The LockIT products are compatible with any standards compliant RJ45 outlet, or LC fiber port. This versatile system can be used in a variety of applications. This flexibility makes LockIT a perfect choice for use in public areas such as schools, retail stores, banks, airports and waiting areas. LockIT is also an ideal solution to protect mission-critical networks such as data centers, health care environments and government systems.

LockIT can protect copper and fiber work area outlets in public areas from tampering or unwanted access

Patch panel and fiber ports may be protected in the work area, wiring closets and data centers

LockIT is ideal to secure active equipment ports against unintended or unauthorized connections or disconnections

Siemon Universal Modular Furniture Adapter

Siemon's extended depth, universal modular furniture adapter was specifically designed as a single product solution for securely mounting work area network connectivity in all of today's most common modular furniture systems. The adapter's universal mounting frame is adaptable to fit a wide range of available opening sizes, providing simple, snap-in attachment of the plates. This combination of mounting frame and plate facilitates the deployment of today's larger diameter, high performance cabling in congested modular furniture pathways without exceeding performance-critical bend radius limits.

Available in MAX[®] and CT[®] versions, this product platform provides a universal mounting solution for all Siemon connectivity lines including CT, MAX, Z-MAX[®] and TERA[®].

Snap-in Faceplate Mounts —

Robust latching features ensure secure engagement onto mounting frame – even with congested raceways – while providing quick and easy installation

Flexible Mounting —

4-port MAX-style and single coupler CT-style plates are available to support a wide range of connectivity options

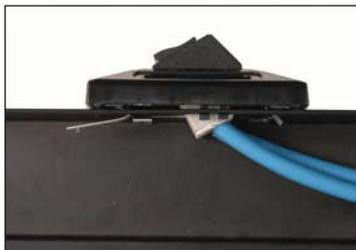

Impact Resistant —

Low-profile, angled surface plates protect outlets while eliminating catch points to reduce potential damage due to incidental contact – a common concern in modular furniture environments

Universal Mounting —

Mounting frame adapts to fit nearly any furniture opening and panel thickness, eliminating the need for furniture-specific mounting products while providing a positive fit uncommon to fixed depth latch designs

Manage Bend Radius —

Extended plate design and optional angled adapters provide additional space to help maintain performance-critical bend radius

Improved Labeling Visibility —

Angled, top-mount label window provides better label visibility in low-light, confined locations common to modular furniture applications

Modular Y-Adapters

Y-Adapters are available as “splitters” which convert one 4-pair jack into two jacks. The Y-Adapters utilize Siemon’s patented UP-2468 plug which allows adapters to be used in 6- or 8-position jacks. The adapter body can be rotated 180° to view either the colored icons or the Y-Adapter pinouts, which are printed on the opposite side.

Y-BRIDGE

Bridges all jack pairs. Compatible with any jack wiring. Provides an additional 4-pair jack with the same wiring.

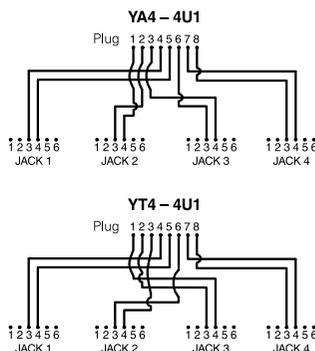

Modular 4-Way Splitter

Siemon’s modular 4-way splitter provides access to each individual pair of a 4-pair modular outlet. The splitter converts a single 4 pair outlet to 4 individual 1-pair, 6-position outlets to enable four unique modular connections. The universal plug design enables compatibility with both 6- and 8-position outlets.

YA4-4U1..... Modular 4-way splitter, T568B

YT4-4U1..... Modular 4-way splitter, T568A

Note: These modular adapters meet category 3 transmission specifications.

Universal Modular Plug

Our patented “universal” modular plug eliminates the need to stock more than one size modular plug. The UP-2468 permits field-termination of modular cords in 2-, 3-, or 4-pair increments and terminates twisted pair cable with 26 – 22 AWG (0.40mm – 0.64mm) solid or 7-strand conductors with insulated conductor diameter of 0.86 – 0.99mm (0.034 – 0.039 in.). Plug contacts have 50 microinches minimum of gold plating over nickel and meet TIA-968-A and IEC 60603-7 specifications.

Part #	Description
UP-2468	“Universal” modular plug fits 6 or 8-position RJ outlets

Modular Plugs

We offer modular plugs in standard configurations to terminate modular cords for patching or work area applications. Modular plugs can be terminated to the exact cable length needed in order to maintain a neater, more organized installation. The plugs terminate twisted-pair cable with 26 – 22 AWG (0.40mm – 0.64mm) solid or 7-strand conductors with an insulated conductor diameter of 0.86 – 0.99mm (0.034 – 0.039 in.). All plug contacts have 50 microinches minimum of gold plating over nickel and meet TIA-968-A and IEC 60603-7 specifications.

P-8-8
8-position modular plug with 8 contacts (compatible with Siemon and Tyco crimp tools)

P-6-6
6-position modular plug with 6 contacts*

P-8-8SS
8-position modular plug with 8 contacts (compatible with Siemon and Stewart crimp tools)

P-6-4
6-position modular plug with 4 contacts*

PS-8-8
8-position shielded modular plug with 8 contacts (compatible with Siemon and Tyco crimp tools)

Technical Tip!

Factory terminated and tested modular cords are required to achieve consistent channel performance. Field termination is not recommended.

*Siemon 6-position plugs provide empty slots in the outer positions to prevent deformation of jack pins 1 & 8 when inserted into an 8-position modular jack.
