AS950 ALL-WEATHER REFRIGERATED SAMPLERS

Sampling has never been this easy.

The AS950 All-Weather Refrigerated Sampler makes programming, data transfer and operation more intuitive and virtually error-free.

Easiest and Most Intuitive Operation

The large full color display and intuitive programming give you access to all your programmable criteria on a single screen—eliminating scrolling through menus and supporting error-free operation.

Most Convenient Data Transfer and Programming Available

The AS950 is the only sampler that utilizes a USB drive to upload and download data and copy programs from one sampler to another.

Confidence in Your Sampling Process

The program status screen instantly communicates alarms, missed samples and program progress for quick and easy troubleshooting.

Resists Corrosion

The All Weather Refrigerated (AWR) sampler base is designed to endure humid and highly corrosive environments, minimizing damage caused by corrosive gases, rodents, and standing water to guarantee environmental integrity.

Accurate and Consistent Sample Preservation

The custom-designed air-sensing thermostat controls temperature in accordance with USEPA and international guidelines, preserving samples regardless of outside temperatures and conditions.

Easy Maintenance at Low Cost

Spring-mounted rollers provide long tubing life keeping maintenance costs low. The desiccant and pump tubing can easily be accessed; the replacement is possible without any tools. The rugged see-through pump cover is made for a quick visual inspection.

Specifications*

Sampling Features

Dual Programs

Up to 2 sample programs can be run sequentially, in parallel, or according to day of week scheduling; enabling a single sampler to function like multiple samplers

Sampling Modes

Pacing:

Time Weighted, Flow Weighted, Time Table, Flow Table, Event Distribution:

Single bottle composite, multi-bottle composite, multi-bottle discrete, bottles per sample, samples per bottle or a combination of bottles per sample and samples per bottle

Run Modes

Continuous or non-continuous

Status Screen

Communicates what program is running, if there are any missed samples, when the next sample will be taken, how many samples remain, number of logged channels, time of last measurement, memory available, number of active channels, if alarms were triggered, when alarms were triggered, active sensors and cabinet temperature

Alarms

Configurable alarms that show on status screen and are recorded in diagnostics alarm logs. Alarms can be set for system diagnostics and logging such as program end, sample complete, missed samples and full bottle. Channel alarms are setpoint alarms for the recorded measurements (channels), such as pH, level and power supply voltage.

Manual Sample

Initiates a sample collection independent of program in progress

Automatic Shutdown

Multiple Bottle Mode: After complete revolution of distributor arm (unless Continuous Mode is selected)

Composite Mode: After preset number of samples have been delivered to composite container, from 1 to 999 samples, or upon full container.

Sample Volume

Programmable in 10-mL (0.34 oz) increments from 10 to 10,000 mL (3.38 oz to 2.6 gal)

Interval Between Samples

Selectable in single increments from 1 to 9,999 flow pulses (momentary contact closure 25 ms or 5 to 12 Vdc pulse; 4-20 mA interface optional), or 1 to 9,999 minutes in one minute increments

Set Point Sample Trigger

When equipped with flow sensor or pH/temperature sensor or peripheral monitoring options, sampling can be triggered upon an upset condition when field selectable limits are exceeded

Datalogging

SAMPLE HISTORY

Stores up to 4000 entries for sample time stamp, bottle number and sample status (success, bottle full, rinse error, user abort, distributor error, pump fault, purge fail, sample timeout, power fail and low main battery)

MEASUREMENTS

Stores up to 325,000 entries for selected measurement channels in accordance with the selected logging interval

EVENT LOG

Stores up to 2000 entries. Records Power On, Power Fail, Firmware Updated, Pump Fault, Distributor Arm Error, Low Memory Battery, Low Main Battery, User On, User Off, Program Started, Program Resumed, Program Halted, Program Completed, Grab Sample, Tube Change Required, sensor communication errors, cooling failed, heating failed, thermal error corrected

Diagnostics

View event and alarm logs as well as maintenance diagnostics

Specifications*

Sample Pump and Strainer

Sample Pump

High-speed peristaltic, dual roller, with 0.95 ID x 0.16 OD cm (3/8 ID x 5/8 in. OD) pump tube

Pump Body

IP37, polycarbonate cover

Vertical Lift

8.5 m (28 ft) using 8.8 m (29 ft) maximum of 3/8-in vinyl intake tube at sea level at 20 to 25 $^\circ\mathrm{C}$ (68 to 77 $^\circ\mathrm{F})$

Tubing

Pump tubing:

9.5 mm ID x 15.9 OD mm (3/8-in ID x 5/8-in. OD) silicone

Sample Volume Repeatability (typical)

 \pm 5% of 200 mL sample volume with: 4.6 m (15 ft) vertical lift, 4.9 m (16 ft) of 3/8- in vinyl intake tube, single bottle, full bottle shut-off at room temperature and 1524 m (5000 ft) elevation

Sample Volume Accuracy (typical)

 \pm 5% of 200 mL sample volume with: 4.6 m (15 ft) vertical lift, 4.9 m (16 ft) of 3/8- in. vinyl intake tube, single bottle, full bottle shut-off at room temperature and 1524 m (5000 ft) elevation

Transfer Velocity (typical)

0.9 m/s (2.9 ft/s) with: 4.6 m (15 ft) vertical lift, 4.9 m (16 ft) of 3/8-in. vinyl intake tubing, 21 °C (70 °F) and 1524 m (5000 ft) elevation

Pump Flow Rate

4.8 L/min (1.25 gpm) at 1 m (3 ft) vertical lift with 3/8-in intake tube typical

Internal Clock

±1 second per day at 25 °C (77 °F)

Intake

Strainers: Choice of Teflon[®] and 316 stainless steel construction, or all 316 stainless steel in standard size, high velocity, and low profile for shallow depth applications

Purge: Air purged automatically before and after each sample; duration automatically compensates for varying intake line lengths

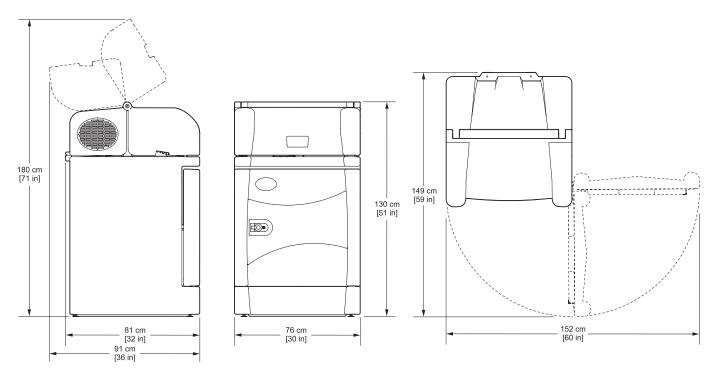

Rinse: Intake line automatically rinsed with source liquid prior to each sample, from 1 to 3 rinses

Retries or Fault: Sample collection cycle automatically repeated from 1 to 3 times if sample not obtained on initial attempt

*Subject to change without notice.

Dimensions

The refrigeration compartment door of the AS950 All Weather Refrigerated Sampler is lockable (two keys are provided). The lid is also lockable for added security.

Ordering Information

Includes AWRS base (115 Vac), sample bottle(s), vinyl intake tubing (25 ft.), and Teflon/stainless steel strainer. To order different combinations, please contact Hach Company.

ASA.CXXX1X11XX	All Weather Refrigerated Sampler with AS950 controller; includes 21-L (5.5 gal) PE container and full bottle shut off
ASA.CXXX1X31XX	All Weather Refrigerated Sampler with AS950 Controller; includes 4 10-L (2.5 gal) PE containers and distributor arm
ASA.CXXX1X41XX	All Weather Refrigerated Sampler with AS950 Controller; includes 24 1-L PE

containers and distributor arm

Bottle Options

- 6559 2.5 Gallon Glass, with Teflon-lined cap
- **1918** 2.5 Gallon Polyethylene, with cap
- **6494** 5.5 Gallon Polyethylene, with cap
- **2318** Set of (2) 2.5 Gallon Glass, with Teflon-lined caps
- 2316 Set of (2) 2.5 Gallon Polyethylene, with caps
- **2317** Set of (4) 2.5 Gallon Glass, with Teflon-lined caps
- **2315** Set of (4) 2.5 Gallon Polyethylene, with caps
- 657 Set of (8) 2.3 Liter Polyethylene, with caps
- **1118** Set of (8) 1.9 Liter Glass, with Teflon-lined caps
- **9493000** Set of (12) 2 Liter Polyethylene, with caps
- **737** Set of (24) 1 Liter Polyethylene, with caps
- 732 Set of (24) 350 mL Glass, with Teflon-lined caps

Bottle Accessories

- 1511 Bottle Tray for 24 and 8 bottle sets
- **1322** Retainer for (24) 1 Liter Polyethylene and (8) bottle sets
- **1056** Retainer for (24) 350 mL Glass bottle sets
- 3527 Extension Tube for 6559 and 1918 Containers
- 8838 Composite Tube Support for all Composite Containers
- 8847 Full Bottle Shut-off for all Composite Containers

Distributors

- 8841 Distributor with Arm for 12 and 24 Bottle Configurations
- 8842 Distributor with Arm for 8 Bottle Configuration
- 8843 Distributor with Arm for 2 and 4 Bottle Configurations

| Intake Tubing and Strainers

920	Vipul Intoleo Tubing, 25 ft, 2/9 in ID
920	Vinyl Intake Tubing, 25 ft., 3/8-in. ID
922	Teflon-lined, Polyethylene Tubing, 25-ft., 3/8-in. ID (requires Connector Kit, Prod. No. 2186)
926	Strainer, Teflon/Stainless Steel
2070	Strainer, 316 stainless steel
2071	Strainer, for shallow depth applications, 316 stainless steel
2186	Connector Kit, for Teflon-lined polyethylene tubing
4652	Strainer, high velocity and shallow depth

Pump Tubing

4600-15	Pump Tubing, 15 ft.
4600-50	Pump Tubing, 50 ft.

8888 Pump Tube Insert

9501400 Pump Tube Insert, Non-contact liquid detect

Factory Installed Options (contact sales representative)

Two Sensor Ports

Accepts Hach digital Differential pH, Hach digital AV9000 analyzer with submerged area velocity flow and/or Hach digital US9000 ultrasonic level sensors

Rain/RS485 Port

Accepts Hach Rain Gauge (not included) or can be used as RS485 communications

Non-Contact Liquid Detect

Sample volume accuracy for applications that require complete tubing replacement

Inputs/Outputs

- **9494500** IO9001 Module (connects through auxiliary port) Includes 1 relay (high voltage).
- **9494600** IO9004 Module (connects through auxiliary port) Includes multiple 0/4-20 mA outputs and inputs for recorded measurements and to receive measurements from external instruments, four low voltage, contact closure, and four relays controlled by alarms.

Accessories

6613100	Anchor Kit Set
9504700	USB Cable, A to A
