

## LIQUID FILLED GAUGES – OPEN FRONT STYLE

# Model 656 2-1/2" (63mm) and 4" (100mm) Open Front Stainless Steel Gauges

### DESCRIPTION

The 656 Series are suitable for corrosive environments in chemical, petrochemical, refining, power, marine, and food and pharmaceutical processing applications. Liquid filled pressure gauges provide users with a number of advantages in certain measurement applications. They are ideally suited for uses on equipment where excessive vibration and pulsation are encountered, such as pumps, compressors, machine tools, etc. The liquid fill minimizes the effect of these severe environments, protects the gauge internals, and provides continuous lubrication on the mechanism, all adding up to extended service life. Liquid filling also provides greater protection of the gauge internals from corrosive atmospheres.

AMETEK liquid filled gauges can be used with a variety of fill fluids including glycerin, mineral oil, and silicone oil. These gauges are available in 63 and 100mm sizes.

### SPECIFICATIONS

**SIZES:** 2-1/2" (63mm) and 4" (100mm)

**RANGES:** 63mm – 30" Hg-0 psi through 0 to 10000 psi (0 psi to 6000 psi on the lower back mount model)

100mm – 30" Hg-0 psi through 0 psi to 23000 psi

**ACCURACY:**

Model 6562 (63mm) – ±1.6% of full scale (Grade B)

Model 6566 (100mm) – ±1.0% of full scale (Grade 1A)

**BOURDON TUBE:** 316L stainless steel

Model 6562 (63mm) – Less than or equal to 800 psi, C type Bourdon tube; greater than or equal to 1000 psi, helical type Bourdon tube

Model 6566 (100mm) – Less than or equal to 1000 psi, C type Bourdon tube; greater than or equal to 1500 psi, helical type Bourdon tube

**WINDOW:** 63mm – Polycarbonate (laminated shatter-resistant glass window optional)

100mm – Laminated shatter-resistant glass window

**MOVEMENT:** 304 stainless steel

**DIAL:** White aluminum with black lettering\*

**POINTER:** 63mm aluminum alloy, black painted; adjustable pointer on 100mm, aluminum black

**CASE AND BEZEL RING:** 304 stainless steel, bayonet type

**CASE PRESSURE RELIEF:**

Top – Rubber disc for 63mm; Back – Rubber disc for 100mm

**PROCESS CONNECTION:** 316L stainless steel

63mm – 1/4–18 NPT standard

100mm – Lower mount 1/4–18 NPT or 1/2–14 NPT standard; Lower back mount 1/4–18 NPT standard

**WORKING PRESSURE:** Steady – 50% of full scale; over range protection – 125% of full scale

**WORKING TEMPERATURE:**

Ambient: -40°F to 140°F (-40°C to 60°C)

Fluid: -4°F to 176°F (-20°C to 80°C)

\* Single scale psi dials are standard, but dials can be changed out at the factory for kPa/psi, kPa, psi/bar, or bar

**WARNING:**

Fill fluids can combine with strong oxidizing agents, including (but not limited to) chlorine, nitric acid, and hydrogen peroxide and result in an explosion which can cause property damage and personal injury or bodily harm. If gauges are to be used in such hazardous service, consult factory for other liquid filling and product alternatives.

In order to correctly use these gauges, it is recommended that users of pressure gauges become familiar with American National Standard ASME B40.100-2005 entitled "Pressure Gauges and Gauge Attachments." This specification is available from the American Society of Mechanical Engineers, United Engineering Center, 345 East 47th Street, New York, NY 10017.
