Imada pull testers can provide solutions to a variety of force measurement applications. Force gauge, test stand and attachments are combined into an adaptable system that offers consistent and reliable testing for checking the pull or pull-off force of wire terminals or other components.

The digital force gauges offer selectable units, data output and have an accuracy of  $\pm 0.2\%$  F.S.

Our motorized stands combine a screw drive system and high performance brushless motors to provide extremely smooth and powerful operation over the entire speed range.

Select from a variety of gripping attachments.
