

Got Debris?

Advantages of using a Cla-Val X-43 H-Strainer in your pipeline

- Protects valves and equipment from pipeline debris
- Low cost
- Ductile iron construction standard
- Fusion bonded epoxy coating standard
- 316 stainless steel strainer
- Available in 150# and 300# classes
- Equipped with a plug on both sides of the unit that can be used for a drain or flush valve
- Top cover can be easily removed for cleaning
- Requires less space: Does not extend below pipe, making it ideal for locations where it is required that the piping be installed at or near floor level, unlike a standard Wye strainer which requires additional space to accommodate strainer's profile

visit www.cla-val.com
Click the "H-Strainer"
Quick Link

Because the Wye-Strainer profile extends below the pipeline, additional clearance is required to accommodate configuration as well as to allow for cleaning of strainer mesh.

Innovation...Experience...Know-How

As a leading manufacturer of automatic control valves, Cla-Val has served the following markets since 1936:

- Waterworks
- Fire Protection
- Aviation Ground Fueling
- Marine and Shipboard Service

We offer many advantages to our customers worldwide, including the following:

- In-house Engineering Department
- Onsite investment and sand casting foundries able to pour more than 50 different metals and alloys
- 22-acre manufacturing facility in Costa Mesa, CA
- Production facilities in Perris, CA; Ontario, Canada; Switzerland; the United Kingdom; and France
- Extensive technical training capabilities
