CLA-VAL™

— MODEL — X140-1

Locking Security Cap

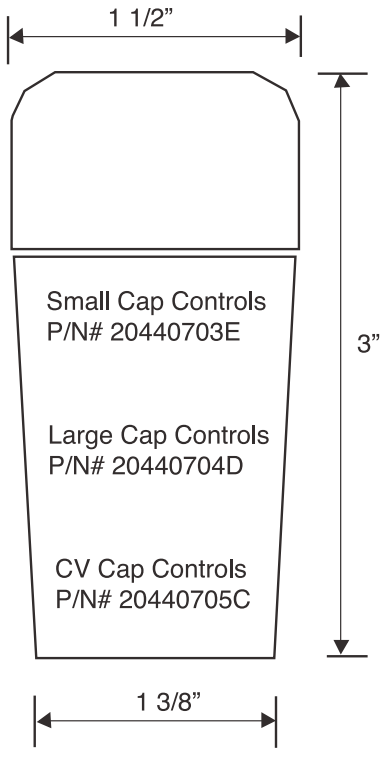
X140-1
Locking
Security Cap

- **Controlled Security for Pilot Control Adjustment**
- **Long Life Stainless Steel Construction**
- **Tamper-Resistant Design**
- **X140-1 Key and Six Pin Cylinder Lock Supplied**

The Cla-Val Model X140-1 Locking Security Cap is designed to completely encapsulate the pilot control adjustment screw with Stainless Steel. Even in the harshest environment, the X140-1 offers an extra level of protection, security and peace of mind for the system operator that pilot control settings will not change until appropriate personnel are present.

The X140-1 Locking Security Cap is available in three sizes for attaching to Cla-Val pilot controls in place of the standard plastic cap.

Dimensions (In Inches)



Specify on order complete pilot-control nameplate data to ensure proper selection of the X140-1.
