

GUARD PATROL SYSTEM TOPGUARD® PATROL

TopGuard® Patrol is very easy to use software that provides the core tools for planning guard tours, collecting tour data and generating tour reports.

TopGuard Patrol enables you to produce comprehensive tour Summary Reports, which show the checkpoints visited, the name of the guard who performed the tour and any incidents encountered. TopGuard helps you to keep track of the tours you are carrying out and ensures that all the tour information is readily available for evaluation.

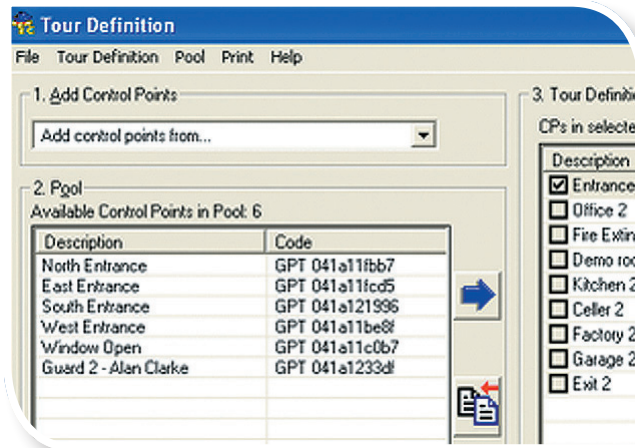

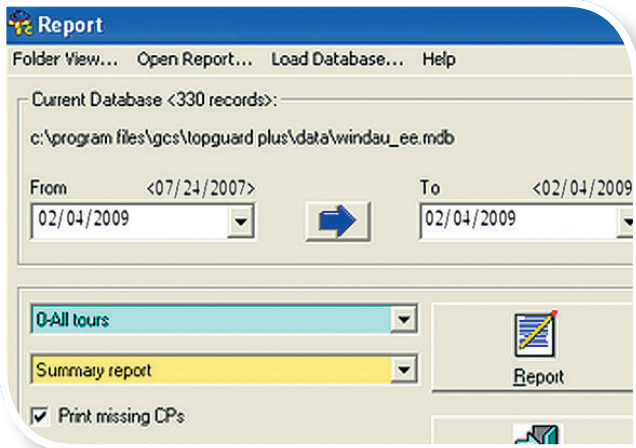

TopGuard is easily adaptable for other facility management service verification tasks.

TopGuard Patrol is the basic version of the configuration reporting software for the ProxiPen. TopGuard Patrol Plus is the advanced version of this popular software. It is an effective patrol system built on the Patrol platform suitable for use by medium sized guarding companies, with a maximum of 7500 checkpoints and 250 tours.

KEY FEATURES

- Easy-to-use software supplied free of charge with ProxiPen® kits
- Provides the core tools for tour configuration reporting
- Up to 16 tours and 1750 checkpoints
- Comprehensive Summary Report enables completed guard tours to be reviewed
- Incidents and the guard's name can be recorded during a tour
- Compatible with all ProxiPen data-collection devices
- Supports Microsoft® operating systems including Windows 8, Windows 7, Vista and Windows 10*
- Upgradable to TopGuard Patrol Plus

* Supported as administrator

LIMITS

- Maximum of 16 tours and 1750 checkpoints

TAG USAGE

- TopGuard Patrol allows RFID tags to be associated with:
 - Checkpoints – to check that each location in a tour has been visited.
 - Incidents – to record important tour events (e.g. “window open”)
 - Personnel – to record the name of the guard performing the tour

SYSTEM SECURITY

- Optionally, access can be given after providing a valid username and password
- Provides both User and Administrator access levels

REPORTS

- Easy to read Summary Report
- The report includes details of each tour, including the time that each checkpoint was visited, checkpoints missed, the name of the guard and any incidents
- Selectable date range for report
- Reports can be printed, saved, sent as an email or produced as an Acrobat® PDF document

INPUT/OUTPUT

- Tour data can be downloaded from any Proxipen data collection devices using a Data Transfer Unit (DTU) directly, or via an optional modem
- Upgradable to TopGuard Patrol Plus
