

SYMMETRY™ SOLUTIONS SECURING YOUR WORLD

www.amag.com

WHO WE ARE

AMAG Technology, a G4S company, designs, manufactures and distributes integrated security systems under the Symmetry™ brand. Our Security Management Systems provide the most feature rich access control and video management solutions on the market today. With flexible, easy to use software and hardware, Symmetry combines all your security needs into one centralized system which helps our clients mitigate risk, increase safety and meet industry compliance regulations. With 35,000 proven installations in 110 countries around the world, we provide scalable security solutions, stand alone or integrated, for any size application in any market.

WHAT WE DO BEST

TECHNOLOGY EXPERTISE & SUPERIOR PROFESSIONAL SUPPORT

As part of G4S, AMAG Technology can deliver products, service offerings and enhanced resources across the globe. With solutions for Access Control, Video Management, Reporting and Compliance, Guarding, Incident Management and more, we can provide centralized security solutions for any application. At AMAG, we take great pride in delivering both technology expertise and exceptional customer service. We earned our quality reputation in the market for the dependability of our Symmetry Access Control Platform and today have built a complete “end to end” solution for our customers that meet all their system’s needs for service, training and support.

OUR CUSTOMERS KNOW WE OFFER MANY ADVANTAGES

- Scalable solutions stand alone to enterprise
- Quality software and hardware with open integrations
- Comprehensive integrated security solutions
- Flexible, cost effective solutions protect your investment
- Experienced Professional Services Department
- Advanced security products and technology solutions
- Proven installations, 35,000 systems, 110 countries
- Global service and enhanced resources as part of G4S
- Solutions for any market, any size around the world

SYMMETRY ACCESS CONTROL SOFTWARE AND HARDWARE

Symmetry's flexible, cost effective access control software is the perfect choice for organizations of any size. With Symmetry you can start small and grow your security system as your organization's needs grow because there are no limits to the size of a Symmetry system. Symmetry offers solutions for Video Management, Alarm Handling, Intrusion Management, and Visitor Management along with robust integrations with 3rd party products for audio, redundancy, analytics, biometrics, HR functions and much more, to create one centralized managed security management solution for all your needs.

Symmetry hardware complements our full featured software offering by giving customers everything they could need for a new or retrofit security solution. From door controllers to card readers that provide intrusion management, Symmetry gives you all the latest technology with a backwards compatible guarantee of protecting your investment.

SYMMETRY SOFTWARE & HARDWARE GIVES OUR CUSTOMERS EVERYTHING THEY NEED

- Intuitive Microsoft® based user interface
- Small systems to integrated enterprise solutions
- Single interface for all security functions
- FICAM Compliant, APL Solutions
- Flexible, user friendly software interface
- Full integration of access and video with alarms
- New or retrofit hardware options
- Investment protection, backwards compatible products
- Feature rich software functionality, advanced add-ons
- PoE hardware designed to save on cost and labor
- Diverse selection of controllers and card readers
- Extensive 3rd party product integrations provide customers with open choice systems

“The system is robust, provides remote use, and incorporates several old systems into one. It has expandability, continued upgrades in software, and multiple layers of security with the addition of smart cards and biometrics.”

- Glen Magel, Director of Safety & Security, BCIT

SYMMETRY VIDEO MANAGEMENT SOFTWARE, HARDWARE & MOBILE SOLUTIONS

Symmetry CompleteView™ VMS offers stand alone or integrated Enterprise Video Management with software, hardware and mobile applications. Our advanced video offering allows AMAG to meet the diverse needs of any video customer. Through a robust software solution and powerful NVR hardware, we give our customers the freedom to choose the best technology specific to their business requirements. Our video products offer the industry's most straightforward, cost effective approach for video management for software, hardware and the migration from analog to IP video technologies.

SOME OF THE VIDEO PRODUCT FEATURES OUR CUSTOMERS RAVE ABOUT

- Scalable Video Management, standalone to enterprise
- Simple pricing model, no server licensing, no client licensing, no site licensing
- Dynamic Resolution Scaling minimizes network impact
- Bi-directional interface with Symmetry access control
- Powerful line of NVRs with six configuration options
- No cost mobile applications for both iOS and Android
- Single Seat Administration from server to clients
- Easy transition from analog to IP at no additional cost
- Extensive line of 3rd party camera integrations

SYMMETRY™ CONNECT
OPERATE MORE EFFICIENTLY

Symmetry CONNECT is an enterprise-wide software platform which helps large multi-site organizations to operate more efficiently. Symmetry CONNECT serves as the single platform that can join disparate systems and databases to provide rich reporting and business analysis that, along with real time information, allows Managers to make better informed decisions on security events and procedures across their entire enterprise. Through this policy based platform, organizations can reduce operating costs, mitigate risk and more effectively determine requirements for audit and reporting to meet compliance regulations.

OUR CUSTOMERS USE OUR SOFTWARE TO MITIGATE RISK, INCREASE SAFETY & MEET COMPLIANCE

- Policy based processes meet audit requirements and industry specific compliance
- Automated card management replaces manual auditing
- Visitor Management improves population tracking
- Site Profile Management automates inventory of security assets
- Incident Management implements escalation procedures
- Virtual Command Center provides geospatial incident mapping for threats to property and assets

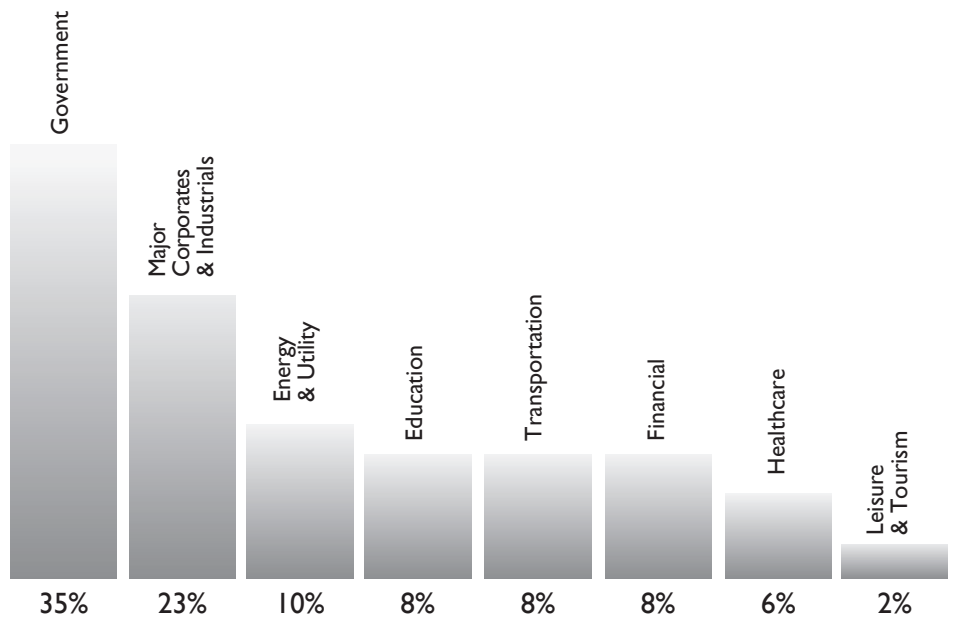

MARKETS WE SERVE
SECURING YOUR WORLD

When security is the highest priority, Symmetry delivers flexible, integrated solutions that help protect government organizations, commercial businesses of all sizes, utilities, educational institutions and healthcare.

AMAG delivers a seamless end to end solution for any vertical market, meeting the most challenging security demands.
