GCS
PROXIPEN KIT

The ProxiPen Kit contains all that you need to start working with the ProxiPen. When you are ready to expand the system, you may buy more kits or you have the option to buy items separately. See also the separate ProxiPen datasheet and accessories.

PROXIPEN-2-KIT

Contains all you need to start, comprising:

- 1 x PROXIPEN-2
- 1 x PEN-DTU-CABLE-USB
- 1 x PEN-DTU-USB
- 1 x TG-PATROL SOFTWARE
- 20 x PEN-TAG-30

PROXIPEN-2 - ProxiPen Data Collection Unit

The ProxiPen is rugged and easy to use. The ProxiPen automatically detects a tag when it comes within range, and provides a confirmation tone and flashes of lights. When reading a tag, the location code, date and time of reading are stored in the ProxiPen. The memory capacity is 4,063 readings. Batteries can be replaced without using special tools.

TG-PATROL - TopGuard Patrol Control Software

The core tool for planning tours, collecting data and generating reports. Up to 16 tours & 1750 checkpoints.

PEN-TAG-30 - Proximity Tag 30 mm Diameter

The tags are supplied with a factory pre-set number. Tags are resistant against weather, dirt, grease and moisture. They can be installed by using a screw, glue or adhesive tape. They can be placed behind glass or under plaster.

PEN-DTU-USB - USB Data Transfer Unit for ProxiPen

Transfers data from the ProxiPen to a PC or modem. It is equipped with an RS232 interface & USB interface. Data exchange between the DTU and the ProxiPen is contactless. Requires 9V transformer power supply in serial operation ONLY.

PEN-DTU-CABLE-USB - USB PC Cable for ProxiPen DTU

To connect the PEN-DTU-USB to a USB port on the PC.
