

# GUARD PATROL SYSTEM

## TOPGUARD® PATROL PLUS

TopGuard® Patrol Plus is a cost-effective tool for the reporting of guard tours. It enables tours to be set up quickly, allows tour data to be collected from a ProxiPen® Data Collection device and provides a comprehensive set of reports for tour evaluation.

TopGuard Patrol Plus can be easily upgraded from TopGuard Patrol – simply t a sentinel to the back of your computer and additional features are made available. This includes the ability to produce a variety of reports for individual tours, de ne up to 250 tours, and print a route map showing the location of all checkpoints in a tour.

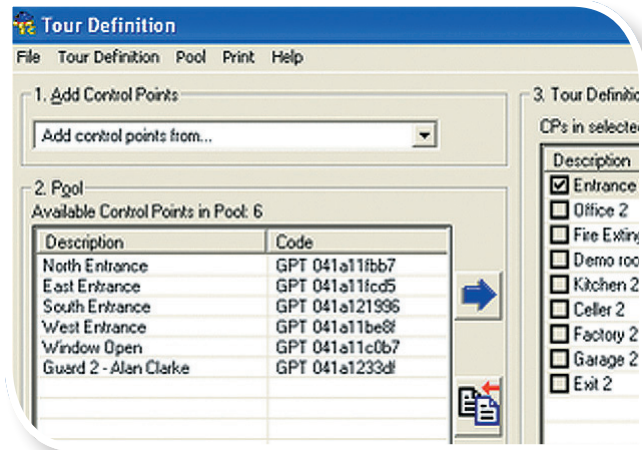

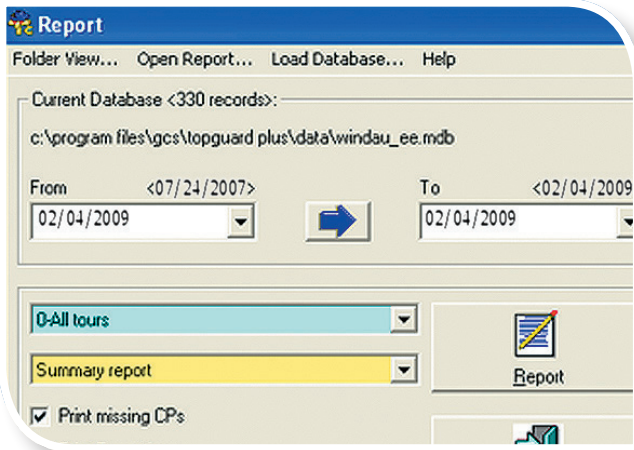

The features offered by TopGuard Patrol Plus enable you to communicate route information to guards more effectively and help you to evaluate completed tours more quickly.

TopGuard Patrol Plus is the advanced version of the popular Guarding software. The other product in the range is TopGuard® Patrol – Basic software containing core tools for the reporting of guard tours, with a maximum of 1750 checkpoints and 16 tours. guarding companies, with a maximum of 7500 checkpoints and 250 tours.

\* Supported as administrator

**LIMITS**

- Maximum of 250 tours and 7500 checkpoints

**TAG USAGE**

TopGuard Patrol Plus allows tags to be associated with:

- Checkpoints – to check that each location in a tour has been visited. Tour checkpoints can be marked as optional.
- Incidents – to record important tour events (e.g. “window open”)
- Personnel – to record the name of the guard performing the tour
- Breaks – to record lunch breaks, etc.

**SYSTEM SECURITY**

- Optionally, access can be given after providing a valid username and password
- Provides both User and Administrator access levels

**REPORTS**

- Individual Summary, Personnel, Control Point, Incident and Break reports
- Reports include details of each tour, including the time that each checkpoint was visited, checkpoints missed, the name of the guard and any incidents or breaks
- Selectable date range for report
- Wide range of print options provided
- Reports can be printed, saved, sent as an email or produced as an Acrobat® PDF document

**INPUT/OUTPUT**

- Tour data can be downloaded from any Proxipen data collection devices using a Data Transfer Unit (DTU) directly, or via an optional modem

**Summary report**
