

FREE FLOAT STEAM TRAP

MODEL JH7.5R-X/JH7.5R-B JH7.5R-X-E/JH7.5R-B-E

FREE FLOAT STEAM TRAP WITH THERMOSTATIC AIR VENTING

Benefits

A reliable and durable cast steel steam trap for use on large-size process equipment. JH7.5R-B is also suitable for high-pressure process equipment.

- 1. Self-modulating free float provides continuous, smooth, low-velocity condensate discharge as process loads vary.
- Constant water seal and unique rotational seating design eliminates concentrated valve wear to provide long maintenance-free service life.
- 3. Up to 1500 or 1600 psig* hydraulic shock rating ensures excellent resistance of the float to water hammer.
- JH7.5R-X: Thermostatic capsule (X-element) with "fail open" feature vents air automatically at close-to-steam temperature.
- 5. **JH7.5R-B:** Thermostatic bimetal air vent valve vents air automatically for rapid startup.
- JH7.5R-X-E/JH7.5R-B-E: Three-point seating ensures a steam tight seal even under no-load conditions.
- Built-in screen with large surface area ensures extended trouble-free operation.
- * Depending on orifice No.

Discharge Capacity

JH7.5R-X/JH7.5R-X-E

1. Line numbers within the graph are orifice numbers.

- Differential pressure is the difference between the inlet and outlet pressure of the trap.
- 3. Capacities are based on continuous discharge of condensate 11°F below saturated temperature.

4. Recommended safety factor: at least 1.5.

Do not use traps under conditions that exceed maximum differential pressure, as condensate backup will occur!

DO NOT DISASSEMBLE OR REMOVE THIS PRODUCT WHILE IT IS UNDER PRESSURE.

Allow internal pressure of this product to equal atmospheric pressure and its surface to cool to room temperature before disassembling or removing. Failure to do so could cause burns or other injury. READ INSTRUCTION MANUAL CAREFULLY.
