

# CHECK VALVE

## MODEL CK3M/CK3T/CK3R

### HIGH QUALITY DISC TYPE CHECK VALVE WITH LOW PRESSURE DROP

#### Benefits

**Compact check valve for steam, air and water services.**

1. Fine machined metal, Fluorine Resin or Nitrile Rubber valve seats provide tight closure.
2. Stainless steel internal parts and body ensure long service life.
3. No wear of valve disc or valve seat even with frequent, impulsive contact between them.
4. Performance assured with installation in either vertical, or horizontal pipelines.
5. Simple construction eliminates problems.
6. Low pressure drop due to large flow area.

\* Perfect sealing cannot be guaranteed for metal or fluorine resin sealing surfaces.

Degradation of, or debris on, rubber sealing surfaces may also prevent perfect sealing.

\*\* When the valve has remained closed for a long period of time, the valve and the valve seat may stick, increasing the necessary minimum opening differential pressure.

\*\*\* Do not use for toxic, flammable or otherwise hazardous fluids.
