VALVE REGULATED LEAD-ACID BATTERY FOR STANDBY APPLICATIONS

Power Solutions

CAPACITIES OF 100 AND 150 AMPERE-HOURS

12-384

C&D Technologies' Standby Power Division front-access valve regulated lead-acid (VRLA) batteries are engineered to save end users both time and money by providing easy access to the battery terminals for installation and maintenance. Engineered with C&D's proven processes, these front-access batteries deliver performance, reliability and consistency over the life of the product.

FEATURES AND BENEFITS

- Front-access terminals with threaded copper inserts for lower resistance and allows for reduced maintenance and overall product longevity
- Certified "Non-Spillable" to DOT-CFR Title 49 parts 171-189 for reduced shipping costs via ground, air and water
- Flame retardant thermoplastic case with UL94 V-0 rating with a Limited Oxygen Index (LOI) of >28
- Positive grids cast from low calcium alloy for reduced gassing and long life
- 48VDC string designed to fit within 23" relay rack on battery trays for system flexibility

 Flame arresting one-way pressure vents for improved life and safety

- Automated thermally welded jar-to-cover seal with 100% testing for improved reliability
- Shipped at 95% capacity with no need to equalize at startup
- Shipped with tin-plated copper connectors and stainless steel hardware for reduced re-torque requirements
- Removable terminal covers with holes for quick
 measurements and added safety

SPECIFICATIONS

Electrolyte at 77F (25C)	1.300 specific gravity nominal sulfuric acid					
System float voltages	2.23-2.27 volts per cell ± 0.02, recommended float 2.25					
Life expectancy	>10 years full float service at 77F (25C)					
Flame retardant container and cover	Flame-retardant, impact-resistant thermoplastic, UL94 V-0					
Safety vent system	Low-pressure release valve					
UL approved	Components tested to UL standards for batteries					

Note: AC ripple current from the charger shall not exceed 5 percent of the 8-hour (ampere-hour) rating of the battery.
