All for dreams

Unidrive M600 features

* Features and their locations vary on some drive sizes

High performance drive for induction and sensorless permanent magnet motors

The M600 is the perfect choice for applications that require high performance open-loop control of induction or permanent magnet motors. SI-Encoder / SI-Universal Encoder option modules are available for applications that require more precise closed loop velocity and digital lock / frequency following of induction motors.

Highly efficient permanent magnet motors from Leroy-Somer

Enhance throughput with high performance open-loop control of induction and permanent magnet motors

- Advanced Rotor Flux Control (RFC) algorithm gives maximum stability and control of induction and permanent magnet motors
- Up to 200% motor overload suitable for heavy industrial machinery applications

Reduce system costs by directly integrating with applications

- M600 incorporates an onboard PLC which can execute Machine Control Studio (IEC61131-3) programs for logic control, sequencing, speed following and digital lock - removing the need for additional PLCs
- Fit up to three SI modules to add safe motion, speed feedback, additional I/O and fieldbus communications

Power System Flexibility

Unidrive M's unique motor control algorithms combined with the latest microprocessor technology ensure it offers the highest stability and bandwidth for all industrial motor types.

This enables users to maximize machine throughput in every application and with every motor, from standard AC induction motors to dynamic linear motors and from energy saving permanent magnet motors to high performance servo motors.

Motor control options available include:

| Control Mode | Features |
|--|---|
| Open loop vector or V/Hz induction motor control | Open loop motor control for induction motors. Easiest configuration. V/Hz can be used for multiple motor control. |
| Open loop Rotor Flux Control for induction motors (RFC-A) | Vector algorithm utilizing closed loop current control to greatly enhance performance for all induction motor sizes. |
| Open loop permanent magnet motor control (RFC-S) | Open loop control of compact, high efficiency, permanent magnet motors (including the Leroy-Somer Dyneo® LSRPM). |
| Closed loop Rotor Flux Control for induction motors (RFC-A)* | Speed and position control for induction motors, supporting a wide range of feedback devices (including quadrature, SinCos, EnDat 2.2, SSI encoders and resolvers). |
| Active Front End (AFE) for power quality and regeneration | Active Front End allows regeneration of energy back onto the power line. The Active Front End also provides power factor control for power quality management and greatly reduces unwanted power harmonics. |

*With SI-Encoder or SI-Universal Encoder option module

Fast and Easy access for Commissioning, Monitoring and Diagnostics

User interface options

Unidrive M600 benefits from a number of keypad choices to meet your application needs. Unidrive M600 is quick and easy to set-up. The drives may be configured using a selection of keypads, SD or Smartcard or the supplied commissioning software that guides the user through the configuration process.

| Type | | Benefit |
|-------------------|---|--|
| KI-Keypad |  | Plain text, multi-language LCD keypad with up to 4 lines of text for in depth parameter and data descriptions, for an enhanced user experience. |
| KI-Keypad RTC |  | All the features of the KI-Keypad, but with battery operated real-time clock, allowing accurate time stamping of events and aiding quick resolution. |
| Remote Keypad |  | Remote mountable keypad. This allows flexible mounting on the outside of a panel and meets IP66 (NEMA 4). |
| Remote keypad RTC |  | The keypad is remote mountable, allowing flexible mounting on the outside of a panel (meets IP54/ NEMA 12). Three line plain text, multi-language LCD keypad for rapid set-up and helpful diagnostics. Battery operated real-time clock allows accurate time stamping of events, aiding diagnostics. |

Unidrive M drive and motor set-up tool screen

Unidrive M Connect commissioning tool

The Unidrive M Connect PC tool is for commissioning, optimizing and monitoring drive/system performance. Its development draws from extensive user research, using human centered design principles to give the ultimate user experience:

- Task-based drive operations are simplified with intuitive graphical tools in a familiar Windows environment
- Dynamic drive logic diagrams and enhanced searchable listings
- Drive and motor performance can be optimized with minimal specialized drive knowledge
- Tool is scalable to match application requirements
- Supports the import of Unidrive SP parameter files and allows full drive cloning (i.e. parameter sets and application programs)
- Matching Unidrive M to Nidec motors (such as Dyneo®) can be achieved quickly and easily using Unidrive M Connect's motor database
- Multiple communications channels for a more complete overview of the system
- Drive discovery gives the ability to find drives on a network automatically without the user having to specify their addresses

Unidrive M's portable memory devices

Smartcard

Smartcards can be used to back-up parameter sets and basic PLC programs, as well as copying them from one drive to another, including from a Unidrive SP:

- Simplified drive maintenance and commissioning
- Quick set-up for sequential build of machines
- Upgrades to be stored on a Smartcard and sent to the customer for installation

SD card

Standard SD cards can be used for quick and easy parameter and program storage using an adaptor. SD cards provide a huge memory capability allowing a system reload if required, and can be easily preprogrammed on a common PC.

Control Mode

Open loop vector or V/Hz induction motor control

Open loop Rotor Flux Control for induction motors (RFC-A)

Open loop permanent magnet motor control

Unidrive M600 ratings and specifications

Environmental safety and electrical conformance

- IP20 / NEMA1 / UL TYPE 1 (UL open class as standard, additional kit needed to achieve Type 1)
- IP65 / NEMA4 / UL TYPE 12 rating is achieved on the rear of the drive when through panel mounted
- Frames 9, 10 & 11 achieve IP55 / NEMA4 / UL TYPE 12 rating on the rear of the drive when through panel mounted
- Ambient temperature -20 °C to 40 °C as standard. Up to 55 °C with derating
- Humidity 95 % maximum (non-condensing) at 40 °C
- Altitude: 0 to 3000m, derate 1 % per 100 m between 1000 m and 3000 m
- Random Vibration: Tested in accordance with IEC 60068-2-64
- Mechanical Shock Tested in accordance with IEC 60068-2-29
- Storage temperature: -40 °C to 70 °C short term, -40 °C to 50 °C long term
- Electromagnetic Immunity complies with EN 61800-3 and EN 61000-6-2
- With onboard EMC filter, complies with EN 61800-3 (2nd environment)
- EN 61000-6-3 and EN 61000-6-4 with optional footprint EMC filter
- IEC 61800-5-1 (Electrical Safety)
- IEC 61131-2 I/O
- Safe Torque Off, independently assessed by TÜV to IEC 61800-5-2 SIL 3 and EN ISO 13849-1 PL
- UL 508C (Electrical Safety)

Unidrive M600 feature and specification table

| | |
|-------------------------|--|
| Performance | Current loop update: 62 µs |
| | Heavy Duty peak rating: 200 % (3s) |
| | Maximum output frequency: 550 Hz |
| | Switching frequency range: 2, 3, 4, 6, 8, 12, 16 kHz (3 kHz default) |
| Onboard intelligence | Programmable Logic Control (PLC) |
| | Real-time tasks |
| | Digital lock control |
| Onboard comms | RS485 |
| Mechanical attributes | Tile mounting on sizes 3, 4, 5 |
| | Common DC bus connections on sizes 3, 4, 5, 6 |
| Parameter back-up | Serial port cloning |
| | SD card (using SD Card Adaptor) |
| | Smartcard reader support |
| Feedback | Optional SI-Encoder/SI-Universal Encoder |
| Onboard I/O | 3 x Analog input, 2 x Analog output |
| | 4 x Digital input, 1 x Digital output, 3 x Bidirectional digital input or output |
| | 1 x Relay output |
| Machine safety | 1 x Safe Torque Off (STO) terminal |
| Power and motor control | Stationary autotune for permanent magnet motors |
| | Wide operating range back-up DC supply |
| | 24 V control back-up |
| Other | Temperature controlled fan operation with user adjustable speed limit |
| | User replaceable fan(s) |
| | Conformal coating |
| | Standby mode (energy saving) |

Optional media and accessories

| Description | Order code |
|-------------------|--------------|
| SD Card Adaptor | 3130-1212-03 |
| Smartcard (64 kB) | 2214-1006-03 |

Internal brake resistor
