

**SPECIAL
FILTER MODULE
FOR
CRUCIAL APPLICATIONS**

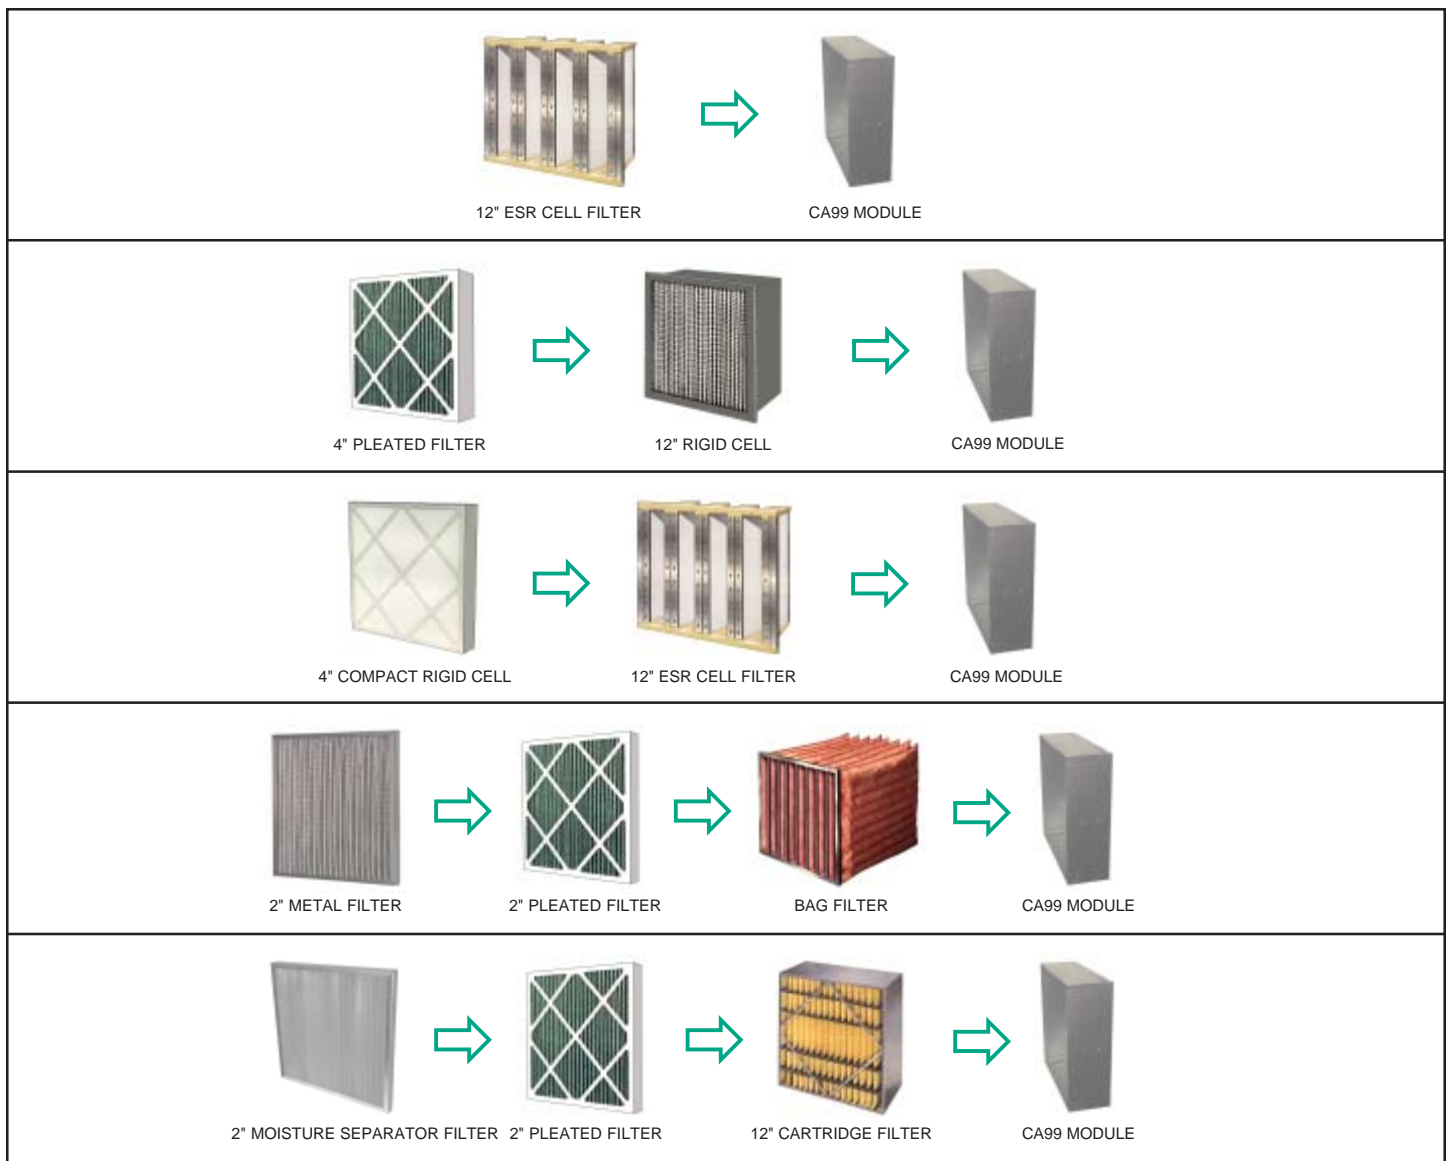

BLC INDUSTRIES INC.
LOUISVILLE, KENTUCKY

CA99

FOR HVAC FILTRATION

BLC's CA99 Special Filter Holding Modules are so versatile and flexible in the ASHRAE Filter combinations they allow that they can practically be considered like "Front Access Side Access Housings". Their Locking Mechanism made of 4 variable pressure spring lock bolts inserted into 4 locking slots provides absolute security while accommodating Final Filter depths of 1", 2" or 4" (*without any retrofit whatsoever!*) Standard 1", 2" or 4" Prefilters can also readily fit into each module's rugged 4", 6" or 8" depth. As a result, you end up with Front Access 1, 2 or 3 stage modules that can be built up in banks, engineered specifically for utilization in AHU make-up air units, air-intake systems and ventilation systems.

**COMBINE ANY 1", 2" OR 4" PREFILTER(S)
WITH ANY 1", 2" OR 4" FINAL FILTER!**

Over 99
Ways to Apply!

CA99 = VERSATILITY + INTEGRITY

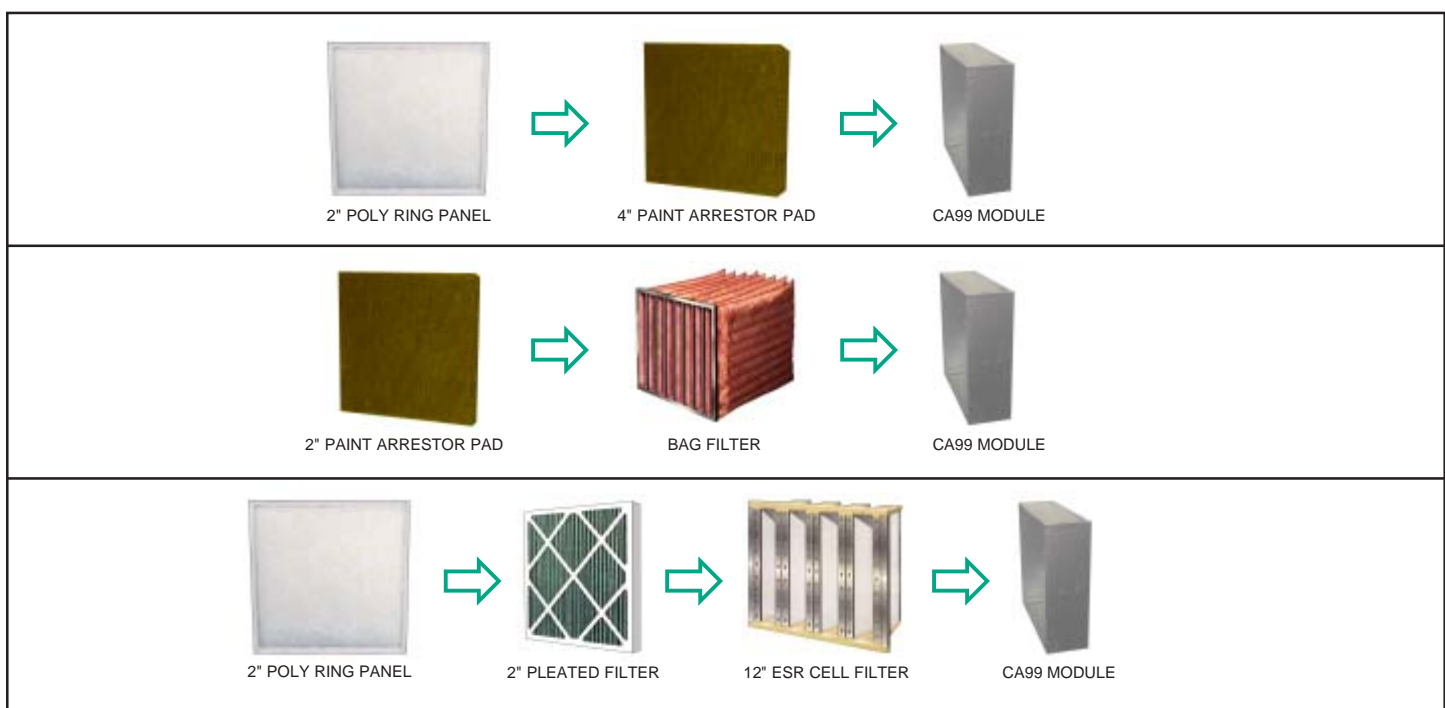

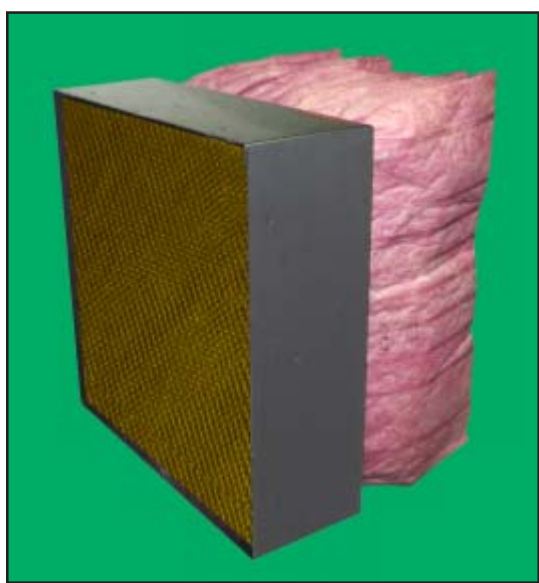

FOR CRUCIAL APPLICATIONS

Up to 99.99%
Efficiency!

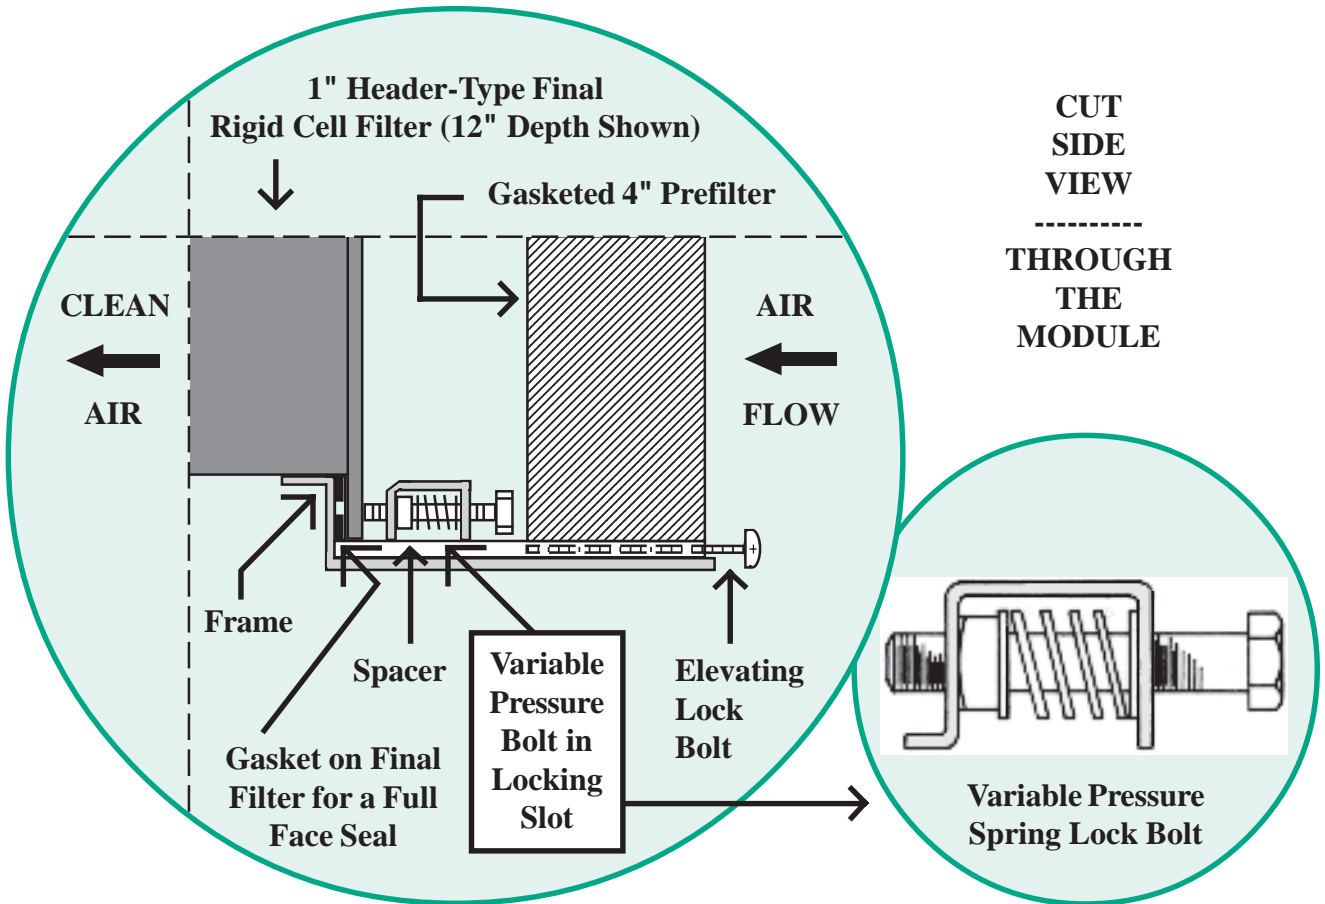

BLC's CA99 allows a wide range of applications for both HVAC Filtration and Paint Collection. The versatility of this Special Filter Module goes far beyond the few examples given here and in other domains.

FOR PAINT COLLECTION

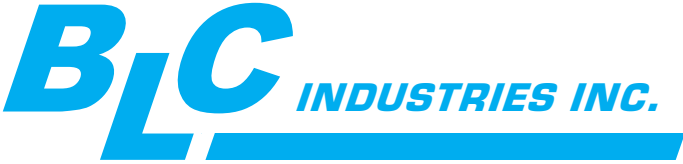

BLC's CA99 Special Filter Holding Modules are ideal to provide an effective system for the collection of paint mists and overspray in paint spray areas. They can be built up in banks, modular style, to offer the very best combination of filters for paint collection. For example, each CA 99 Module of a built-up bank could combine a 2" Paint Arrestor Pad and a 2" Poly Ring Panel for Prefiltration with a Bag Filter for Final Filtration. Such a system would effectively remove paint overspray solids which would otherwise contaminate the air-exhaust ductwork, allow high dirt or dust holding capacities and generate effective filtration. Its solidly welded construction and gasketing would also prevent any air bypass.

**COMBINE ANY 1", 2" OR 4" PREFILTER(S)
WITH ANY 1", 2" OR 4" FINAL FILTER!**

Quality and Service Assurance

A Quality Manufacturer of Air Filtration Equipment, Filters and Components

BLC Industries assures the quality and performance of its CA99 Special Filter Module for Critical/Crucial Applications. With material inspections, in-house process reviews, independent tests and most importantly Final Product Inspection before shipping, BLC ensures customer satisfaction and guarantees quality!

For Quality, Economy, Innovation and Service... It's always BLC!
