

PORTABLE PUBLIC ADDRESS SYSTEMS

Get the Message Out Loud & Clear

Califone portable presentation systems provide mobile audio amplification solutions for school venues including classrooms, assemblies, athletic events and larger groups. Our PA systems make sure messages are clearly communicated and heard with a range of power and features that help presenters hold an audience's attention more fully and for longer periods of time. These flexible AC and battery-powered PA products send audio from multiple input sources including microphones, media players, computers and streaming data from mobile devices without requiring the know-how of an AV expert.
