Vac Tanks Industrial/Commercial

Progress Tank offers a wide range of code and non-code vacuum trucks for industrial and commercial applications. Combining state-of-the-art technology with decades of engineering and manufacturing experience, our vacuum tank units are designed to minimize downtime and maximize productivity. Committed to providing best-in-class quality, every Progress Tank vacuum truck is built to stand up to the most abusive environments and engineered for safe, simple operation and easy maintenance.

Our industrial and commercial units are available with carbon steel, aluminum, or stainless steel tanks in capacities ranging from 1,500 to 5,000 U.S. gallons. We offer a wide range of high-performance options so your equipment can be specified to fit your specific application and operation.

Whether you need a stock unit that is work ready or a specialized unit custom-built for your business,

Progress Tank can get you up and running fast. We utilize three tank production facilities across the U.S. to ensure tanks are available when you need them. Looking for a refurbished unit? We have access to used equipment across the U.S. to help you find what you need. We also carry a full line stock tanks and parts to help keep your vehicles in operation day after day. Call us or visit our website today!

About Progress Tank

Since 1922, Progress Tank has been a leading manufacturer of truck-mounted tanks used in the refined fuel, heating oil, propane and liquid waste industries. Today, we also offer complete tank and chassis upfitting services to provide you with turnkey units. Progress Tank brand tanks and service units are produced by Wabash National Corporation, North America's largest manufacturer of semi-trailers and liquid transportation systems.
