

Safe, precise and cost-effective metering

Low-pressure metering pumps up to over 1,000 l/h

Contents

Low-pressure metering pumps up to over 1,000 l/h

Thanks to the extensive diversity of its product range (dosing head, size, capacity, set up and control options), ProMinent® low-pressure metering pumps are capable of performing all metering tasks sustainably and environmentally-friendly, at the same time saving energy.

Get in touch with us and discover the manifold opportunities provided by ProMinent® low-pressure pumps.

ProMinent

Our extensive **product range** – precise metering and unlimited reliability

You undoubtedly know ProMinent as a manufacturer of solenoid metering pumps? In fact, that is our origin and we are the global market leader in this product range. However, over the 55 years that we have been in existence, we have substantially extended our product range for our customers. Why? Because we know and understand that you, as our customers, do not simply want a product from us, rather a solution to your problem – and justifiably so.

Every industry “works” differently, that is to say, has its own unique peculiarities. We have adapted to this.

Expertise alone is not enough. Our customers are essential for ProMinent’s success story. Their trust and the intensive exchange of ideas relating to their requirements and needs is what has made our success possible.

World market leadership brings obligations, such as the need for close exchanges with customers. This dialogue shows that the trend is moving towards

more energy-efficient and environmentally-friendly technologies. ProMinent is reacting to this with manifold product developments. With energy-efficient products. This means that the future will bring many more innovations in the field of chemical metering and water treatment developed in Heidelberg. They all have only one goal: to exceed our customers’ expectations.

Solenoid Driven Metering Pumps

Low-wear pumps for low capacities

Mode of operation

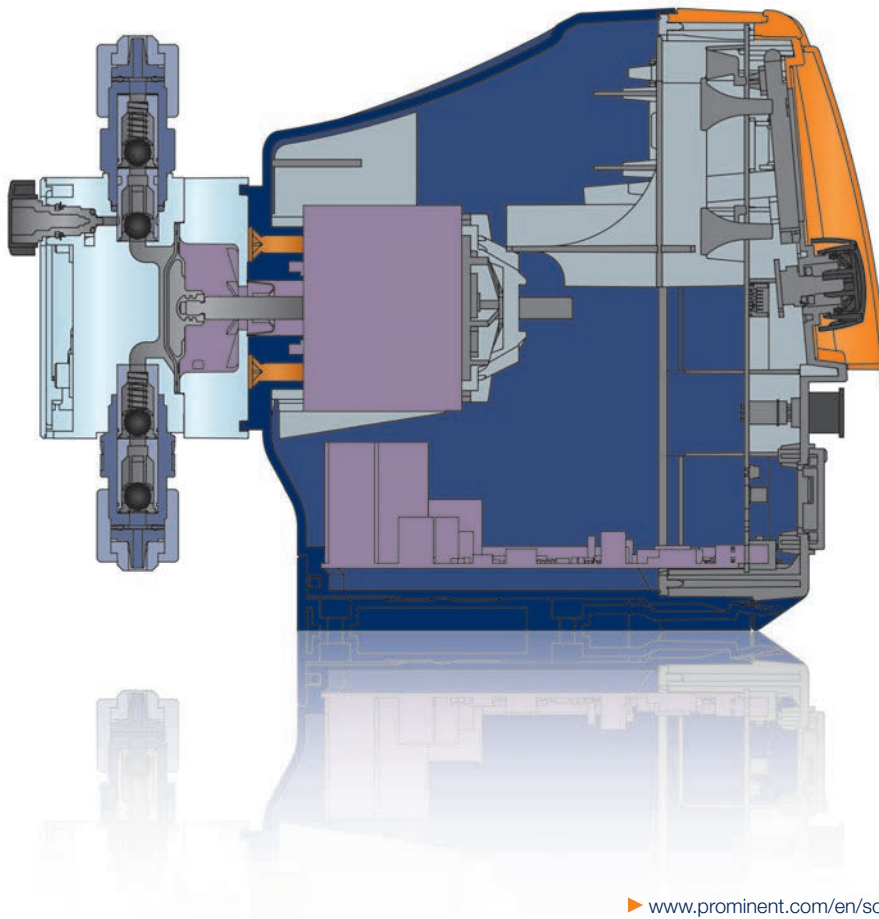

A magnet moves the solenoid shaft forwards and backwards by switching on and off. This stroke movement is transmitted to the diaphragm in the dosing head. Two non-return valves prevent the dosing medium flowing back during pumping. The stroke length and stroke rate can be adjusted to alter the capacity of a solenoid driven metering pump.

Features

- Capacity range: 0.74 to 80 l/h at 25 to 2 bar back pressure
- Virtually wear-free power end/drive, as only one moving part is used – the pump has no lubricated bearing or shafts
- Outstanding long-term stability
- Cost-effective technical alternative in the lower capacity range
- Maximum safety from overloading
- Low energy consumption thanks to excellent efficiency
- IP 65 degree of protection due to fully sealed housing

Applications

- General: Chemical metering in laboratories and in industry up to 80 l/h pump capacity
- Potable water and swimming pool water treatment: Metering of chemicals for disinfection and for pH correction
- General water treatment, water treatment of process water, industrial water and conditioning agents
- Cooling water circuits: Metering of disinfectants
- Mini-plant technology
- Paper industry, de-foamers
- Electroplating and surface treatment, pool additives, slide grinding systems

Motor Driven Metering Pumps

High dosing precision and robust technology

Mode of operation

The rotation of an electric motor is stepped down by a worm gear and converted via a cam into a linear stroke movement. The slide rod transmits this stroke movement to the diaphragm in the dosing head. The feed chemical is prevented from flowing back during pumping by two non-return valves. The stroke length and stroke rate – in this instance the motor speed – can be adjusted to alter the capacity of a motor driven metering pump.

Features

- Extremely broad capacity range
- High dosing precision even under varying pressure conditions (rigid characteristic) enables chemicals to be reduced and ensures exact process control
- Robust and cost-effective power end/drive in higher capacity classes
- Simple integration and retrofitting into automated processes by flexible control via stroke length and motor speed control
- Maximum safety thanks to multi-layer safety diaphragm with rupture warning system
- Sigma Basic type: Robust pump for safe and reliable use
- Sigma X Control type: Reliable, smart and network-friendly

Applications

- General: Chemical metering up to over 1,000 l/h
- Potable water treatment: Metering of disinfectants
- Cooling circuits: Metering of disinfectants
- Waste water treatment: Metering of flocculants
- Paper industry: Metering of additives
- Plastics production: Metering of additives

Capacity at a Glance Low-pressure metering pumps

alpha c

Motor driven metering pumps

The economical solution for simple applications in the low capacity range.

- Capacity range
1.0–30.6 l/h, 10–2 bar
- Excellent priming capacity, gentle metering stroke and consistently precise metering
- Reliable operation even with gaseous media thanks to patented venting system
- Suitable for many applications due to two gear reduction ratios, four liquid end sizes and two material versions (PVDF, clear acrylic/PVC)
- Capacity can be adjusted via the stroke length in 10% increments
- Control via ON/OFF voltage supply

Pump type	Pump capacity with 50 Hz design			Stroke rate Strokes/min	Stroke length mm	Suction lift mWs	Connector size a Ø x i Ø mm

Vario C

Motor driven metering pumps

The basic pump for simple applications and continuous metering.

- Capacity range
8–75 l/h, 10–4 bar
- Excellent priming capacity, gentle metering stroke and consistently precise metering
- High level of process quality:
Reproducibility of the metering is better than $\pm 2\%$
- Robust construction: powerful drive motor, impact-resistant and chemical-resistant housing made of fibreglass-reinforced plastic
- Good adaptation to the specific application, thanks to four different gear reduction ratios and two sizes of liquid ends in two material designs

Pump type	with 1500 rpm motor at 50 Hz operation, pump capacity at max. back pressure			Stroke rate Strokes/min	Suction lift mWS	Reliable pre-pressure on suction side bar	Connector Suction/ discharge side G-DN

Sigma Basic type

Motor driven metering pumps

The right capacity for every application. There are two different types of the Sigma product range available (Basic type and Control type).

The three versions differ in terms of their capacities:

- Sigma/ 1** 17–144 l/h, 12–4 bar
- Sigma/ 2** 50–420 l/h, 16–4 bar
- Sigma/ 3** 146–1,040 l/h, 12–4 bar

- Process safety thanks to dual diaphragm with diaphragm rupture warning system
- Reliable operation due to venting option
- Integrated relief valve protects against overloading
- Simplified management of spare parts when using the Sigma product range
- For volume-proportional, time-controlled, pulse-controlled and measurement-dependent metering
- 2 standard materials
PVDF/PTFE, stainless steel/PTFE

Sigma X Control type

Motor driven metering pumps

The Sigma Control is a smart, flexible motor-driven metering pump that sets new standards in terms of productivity, reliability and safety.

The Sigma X diaphragm metering pump covers the capacity range from 21 to 1,040 l/h in the S1Cb, S2Cb and S3Cb variants. It efficiently protects the power end from overloading by means of an integral frequency converter with microprocessor control. One highlight is the standardised operating concept with click wheel and 4 additional operating keys on a removable control unit. A large illuminated LCD and a 3-LED display for operating, warning and error messages, visible from all sides, provide extra operating convenience. The Sigma, like all smart ProMinent metering pumps, can be flexibly connected to various bus systems. It has a large adjustment range thanks to a combination of frequency and stroke length adjustment. The pump works with high precision across the entire frequency range. Viscous and gaseous media can be metered accurately and without complication by adjustment of the movement profile. Operating statuses are transferred remotely via additional relay modules. Suitable spare parts can be shown on the display.

- External control is scalable via potential-free contacts with pulse step-up and step-down, batch mode or via a 0/4-20 mA standard signal
- Can be flexibly networked: Connection to process control systems via integrated PROFIBUS®, CANopen interface (optional)
- Bluetooth and Wi-Fi connection for the simple configuration of parameters and call-up of process data (optional)

Beta[®] b

Solenoid driven metering pumps

The first choice for modern water treatment and chemical metering.

- Capacity range
0.74–32 l/h, 25–2 bar
- up to 50 % energy-savings through improved efficiency
- Adjustable, integrated pulse step-up and step-down for optimum adaptation to external signal generators
- Dosing heads to suit all chemicals ensure all-purpose use
- Virtually wear-free power end/drive
- Outstanding long-term stability
- Optional: Relay module can be quickly and simply retrofitted
- Input for level switch

gamma/ X

Solenoid driven metering pumps

The gamma/ X is ideal for all metering work involving liquid media.

- Capacity range
2.3 –45 l/h, 25–2 bar
- Simple adjustment of the capacity directly in l/h
- Trouble-free processes by the detection of hydraulic malfunctions or blocked discharge lines
- Integrated pressure measurement and display for greater safety during commissioning and in the process
- Integrated 7-day timer for timed metering tasks
- Connection to process control systems via bus interfaces, such as Profinet, CAN bus, from the 3rd quarter of 2015, others on request

gamma/ XL

Solenoid driven metering pumps

The gamma/ XL is a smart, connectible solenoid-driven metering pump that sets new standards in terms of productivity, reliability and cost-effectiveness.

- Capacity range
8–80 l/h, 25–2 bar
- Simple adjustment of the metering rate directly in l/h or gph
- Integrated pressure measurement and display for greater safety during commissioning and in the process
- Bluetooth and Wi-Fi connection for the simple configuration and call-up of process data (optional)
- Adjustment range of metering rate 1:40,000
- Direct input of the required final concentration in concentration mode for volume-proportional metering tasks
- Virtually wear-free solenoid drive, overload-proof and economical

Pneumados

Pneumatically-driven diaphragm metering pumps

The standard solution for simple metering tasks wherever no electrical power is available.

- Capacity range
0.76–16.7 l/h, 16–2 bar
- Continuous stroke length adjustment
- Material versions PTFE and stainless steel
- Stroke rate of up to 180 strokes/min

Typical applications

- Car-washing systems
- Animal feed treatment
- Bottle disinfection in bottling plants

Pump type	Pump capacity at max. back pressure			Stroke rate Strokes/min	Suction lift mWs	Connector size a Ø x i Ø mm

DULCO®flex

Peristaltic pumps

The best solutions are simple. The optimum pump for typical use in swimming pools, Jacuzzis and spa and wellness facilities.

DF2a for private swimming pools

DF4a for private and public swimming pools, and for general chemical metering.

- Capacity range
0.4–12 l/h, 4–1.5 bar
- Virtually silent operation
- Simple and safe to operate
- Efficient operation through
“eco mode” possible
- Service-friendly design
- Spring-mounted rollers for uniform
roller pressure and increased service
life of the hose
