

Wouldn't it be great...

**If you could reduce labor
and increase profits
with one piece
of equipment?**

43 years of putting materials, snow and ice in their place

One machine can do it all.

If you think that is a far-reaching claim please read on.

Improve efficiency. Increase profitability.

The TerrainPro gets what you need where you need it with speed and efficiency.

And with the man hours you save, you can repurpose that manpower where you need it. If you have a smaller crew, the efficiency will allow you to take on projects that would have typically been out of your reach and realize new profits.

This is an investment that can pay for itself, take a load off of your employees, and increase profit.

Reduce your labor costs by up to 60%

Moving and distributing materials is a labor-intensive task.

The TerrainPro is designed from the ground up considering the materials typically used in maintenance and construction, and then engineered into a single piece of equipment to efficiently automate the back-breaking tasks.

Work smarter, not harder.

Innovative machine does the job of many.

With innovative features like our Live Floor System, Curb-side Discharge and powerful Honda GXi390 Engine, one versatile piece of equipment can do it all...and better.

Leaf Vac - the powerful vacuum, auto tarping system, and fast discharge add unparalleled efficiency.

Mulching - wheelbarrow loads in 3-6 seconds unassisted provides speed and finesse beating out dusty plant damaging mulch blowers.

Trailer - the forward and reverse Live Floor action provides easy loading and unloading of any skidded materials. It also handles nearly any bulk material with rapid discharge and unbelievable precision with the hand-held remote control.

Up to 7 foot extension conveyor

Options

Specifications

- Quick Discharge Live Floor system
- High output side-discharge conveyor
- 13HP Honda GXi390 engine w/ remote start
- High efficiency hydraulic system w/ remote
- Heavy duty tail gate and bumper
- Load specific rated axles and tires
- Automatic tarping system
- Conspicuity tape and bi-lingual safety stickers

Tough equipment.

We've engineered the TerrainPro to go the distance with heavy-duty construction that can shoulder the heavy work. The heavy-duty reinforced aluminum construction, live floor system, hydraulics and controls, suspension, and power plant are rated for demanding performance.

The TerrainPro doesn't do sick days.

Size matters.

The TerrainPro comes in two sizes. Bigger capacity means bigger profits. *Do you want to start with the M3-10? Ask us about our trade-up options as your needs grow.*

M3-10: 10 Cubic Yard Capacity, 10' hopper

M3-15: 15 Cubic Yard Capacity w/ hydraulic jack, 14' hopper
Higher rated suspension

Truck Mount & Roll-Off Models

In many cases high volume demands call for a dedicated vehicle. *Ask about our truck mounted model...your truck or ours.*

We can bring it. We can take it. Bring it on.

With two ways to load and 2 ways to unload, you will be able to handle most bulk materials with ease and efficiency.

And when you really put the Live Floor to work you'll find you can haul just about anything you can get into it, and get it out in as quick as 45 seconds.

Soil

Mulch

Leaves - spring and fall clean-up

Debris

Stone & Aggregate

43 years of putting materials, snow and ice in their place

Tough Equipment

You need to be on the road in every season with the toughest line of equipment available. With the latest in oil field, environmental services, leaf collection, snow and ice control, catch basin cleaning, spreading a wide variety of materials, dump truck beds and truck accessories. The American Road Machinery Company is the solution of choice to get the job done quickly and cost effectively.

- Snow and Ice Control
- Replacement/Service Parts
- Dump Truck Bodies
- Truck Accessories
- Oil Field Equipment
- Vacuum Leaf Collectors
- Aerial Lift Trucks
- Grappler Trucks
- Septic and Pressure Vessels
