

# ClearView VTM

**The ClearView Takes the Next Step in the Evolution of the Value Adder Series - Adding the Power of the Internet**

For over a decade, the ESD Value Adder Plus VTM has been in service in thousands of laundry rooms across the nation. Convenience, security, and reliability have made it one of the most popular VTM on the market.

ESD has now utilized the power of the Internet to add on demand reporting and complete transparency to one of its most successful products. Constructed in the same cabinet as the Value Adder Plus High Security, ClearView shares the reputation of being the most secure Value Transfer Machine on the market.

ClearView utilizes a wireless card reader and router that communicates with a server over the Internet to record every transaction. Every currency insertion is tracked and recorded with real time reporting 24 hours a day, 7 days a week. ESD has designed reports to monitor and manage all activity including the real time cash total in the VTM. The ClearView features colorful graphics that offer very simple directions in friendly bi-lingual text and a bright florescent display.

Front Access — 11-100-012  
Rear Access — 11-100-013

**ClearView VTM Benefits:**

- ✓ Add Value to SmartCards with Cash
- ✓ Dispenses SmartCards for Cash
- ✓ Connects to Internet via Hardwire to Local Modem, or Wirelessly Using an Air-card
- ✓ Internet Offers Complete On Demand Information
- ✓ Bi-lingual Display Prompts (English and Spanish)
- ✓ Data-Trac™ Card Serial Number Tracking

<b>Remote Audit Capability</b>	Requires Internet Connection

The ClearView can be mounted on a wall surface, embedded between studs or mounted or mounted on an optional pedestal base. For rear access models the VTM is shipped with two right angle brackets for attaching to the wall studs.

The Optional Pedestal Base is ESD Part Number - 70-050-200. The high security guard to cover the two Medeco locks is ESD Part Number 70-050-271. To secure the guard in place a Medeco hockey puck lock and Medeco deadbolt lock – ESD Part Number 72223 is required. While ESD believes the cabinet is designed to discourage compromise, it is the responsibility of the operator to make certain that the VTM installation is secure.
