

## Trackless Trolleys

Cable Car Concepts Trackless Trolleys are beautiful and durable and provide a unique look that is clearly identifiable. One feature on our trackless trolleys, not available from any other vendor, is our one-piece fiberglass roof providing a tight roof which is unique in the trolley business. You can see from the pictures that we have a blended bumper which conceals 4" steel surrounding the trolley for collision strength.

Great American Trolley operates a fleet of nearly 50 trackless trolleys and our operating people have made sure that our units are highly maintainable. In addition, we feature a beautiful all oak interior on walls, seats and roof. These units are attractive for weddings and special events. They also have the durability for heavy duty operation.

The Four basic types of Trackless Trolleys differ in the capacity and intended application. They are:

**MINI**

**MIDI**

**MAXI**

**TROLLECOACH**

## **Trackless Trolleys**

### **Design and Manufacturing**

Cable Car Concepts has tried and tested designs with hundreds of trackless trolleys operating across the country. This experience allows us to customize your trackless trolley to accommodate the specific application requirements.

### **Quality Assurance**

1. With nearly 20 years of trackless trolley operating experience, we know the need for reliability can only be met by ground up quality assurance.
2. Maintaining a vehicle requires it to be reliable and easy to maintain.
3. Car Concepts has injected this strong operating background into a total assurance program.

### **Service**

Our experience has shown minimal service needs on our units after the sale. However, like the washer repairman we're ready with parts and technical support.

# Trolleys

## Altoona Testing

Several of our trolleys have been successfully Altoona Tested. These designs are being used extensively.

## Tap Our Experience

Our Company has been operating trolleys for over 20 years and we have information to offer our customers on how to develop a successful operation in nearly every application.

We can also offer money making ideas and strategies for a good return on investment. There are four basic sources of revenue:

- Advertising*
- Trolley Fares*
- Charters and parties*
- Trolley stop service charges.*

Contact us and we can help you expand on these.
