Titanium™ Headsets & Headphones

Headsets and headphones used in classrooms are constantly handled and worn throughout the school week. To keep them in top condition and clean, Titanium™ headsets and headphones can be washed in soap and water once their cord has been detached. Once clean and dry, simply reconnect the replaceable cord and it is ready for reuse.

The Titanium™ series of Mac & PC compatible stereo headsets optimize differentiated learning experiences with breakthroughs in safety, performance, comfort and durability. Since schools and students in BYOD environments utilize different devices when listening with headphones, the Titanium headsets are available with either a USB plug, dual 3.5mm plugs and also a single 3.5mm To Go plug to connect with iOS and Android-based smartphones, tablets and computers.

Choose among single 3.5mm To Go, USB, and dual 3.5mm plugs.

Headsets

While Quantities Last

Gaming Headsets

Using digital games for learning is quickly becoming mainstream in K-12 classrooms. These headsets provide crisper, brighter audio with 5.1 & 7.1 Surround Sound for an immersive audio experience with 3D effects that enable you to discern sound directionality. Their inline audio features are detachable so they can be connected via 3.5mm plug into any smartphone or tablet as well as laptop/desktop or Chromebook via USB plug.

GH131

The GH131 is a comfortable, lightweight headset that enables you to discern vital sound directionality within your game. Its advanced inline audio features can be detached when not gaming so it can be connected with its 3.5mm plug into any smartphone, tablet, laptop/desktop or Chromebook.

GH131 Convertible USB/3.5mm stereo mini plug \$59.99

GH507

GH507

The GH507 offers advanced inline audio features and its 3.5mm plug can be connected to any smartphone, tablet, PC or Chromebook. This sturdy headset provides premium audio for an immersive gaming experience and is ideal for solo use or playing as a team member. Its adjustable boom mic is ideal for online chat and can also be detached for listening only mode.
