

ESD Utility Controller

A Simple Product That Has a Single Function to Hold and Secure a CardSlide that will Read and Display the Information on the Inserted Card

In a SmartCard application, a CardSlide can be snugly encased in this metal box to read and display the information on a SmartCard in the following examples:

1. In a large Laundromat, it can be placed in a remote location for a customer to check the balance on their card
2. If a location is changing site codes, the Utility Controller can read the balance on the old card so that an equal balance can be added with a Desk Top VTM to the new card.
3. In a large multi-housing complex, a Utility Controller can be spotted some distance from a laundry room or VTM so the resident can view their balance before visiting a more distant VTM location.

In a SmartLink application the CardSlide can be encased in this metal box and mounted atop a washer to display pricing information or to allow credit card and debit card payment on a washer that accept quarters.

Other applications for the Utility Controller could include:

- Parking Gates
- Copiers
- Facsimile Machines
- Gaming

SmartCard CardSlide — 11-000-811

ESD Utility Controller Benefits:

- ✓ Can Accept Smartcards or Mag Strip Cards
- ✓ Bright Easy to Read Display
- ✓ Compact "Meter Case" for Protection of Cardslide
- ✓ Compact "Meter Case" for Protection of Cardslide
