

PowerTrap®

MODEL GT10/GT14

COMBINATION PUMPING AND TRAPPING SECONDARY PRESSURE DRAINER

Benefits

Pump/trap with built-in steam trap for a wide range of applications: drainage of heat exchangers, flash steam recovery systems and non-vented receivers such as low-pressure stages of turbines and absorption chillers, often operating under vacuum conditions.

1. No cavitation or seal leakage.
2. Non-electric design with durable nickel-based alloy compression spring for reliable performance.
3. Externally removable motive medium intake valve protected by an internal screen provides excellent serviceability.
4. Intake/exhaust valve heads are both Rockwell 65C with 55C/45C seats for maximum durability.
5. High quality stainless steel internals ensure reliability.
6. Two-year snap-action mechanism and lifetime spring warranty.*
7. Float resists shock to 1340 psig.

* Contact TLV for details

Specifications

Model		GT10			GT14		
Body Material		Cast Iron			Cast Steel		
Connection	Pumped Medium Inlet & Outlet	Screwed	Screwed	Flanged	Screwed	Screwed	Flanged
	Motive Medium & Pump Exhaust						
Size (in)	Pumped Medium: Inlet x Outlet	3 x 2		2 x 2, 3 x 2	3 x 2		2 x 2, 3 x 2
	Motive Medium Inlet	1			1		
	Pump Exhaust Outlet	1			1		
Maximum Operating Pressure (psig)	PMO	150			200		
Maximum Operating Temperature (°F)	TMO	365			392		
Maximum Allowable Pressure (psig)	PMA	200		230	200		230
Maximum Allowable Temperature (°F)	TMA	428			428		
Motive Medium Pressure Range (psig)		5 – 150			5 – 200		
Maximum Allowable Back Pressure (psig)		7 psi less than motive medium pressure used			7 psi less than motive medium pressure used, but not to exceed 150 psig		
Volume of Each Discharge Cycle (gal)		approximately 8					
Motive Medium*		Saturated Steam					
Pumped Medium**		Steam Condensate					

* Do not use with toxic, flammable or otherwise hazardous fluids. ** Do not use for fluids with specific gravities under 0.85 or over 1, or for toxic, flammable or otherwise hazardous fluids.

To avoid abnormal operation, accidents or serious injury, DO NOT use products outside of the specification range. Local regulations may restrict the use of this product to below the conditions quoted.

Connections and sizes in bold are standard

Dimensions

• Screwed*

Weight (lb): 280 (Cast Iron), 306 (Cast Steel)
* NPT, other standards available

• Flanged**

Weight (lb): 328 (Cast Steel)
** ASME Class 150 RF (GT10, option for GT14), Class 300 RF (GT14), other standards available

Units: inch

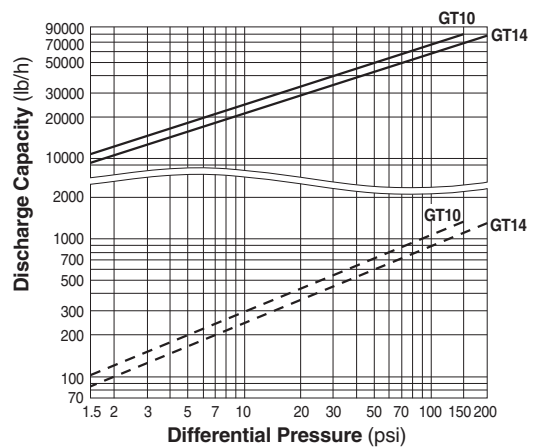

Reservoir Sizing Table

The reservoir must have a capacity sufficient to store the condensate produced during the PowerTrap operation and discharge.

Amount of condensate lb/h	Reservoir diameter (in) and length (ft)						
	1 1/2	2	3	4	6	8	10
500 or less	3.0 ft	2.0					
700	4.0	2.5	1.0				
1,000	5.5	3.5	1.5				
1,200		4.5	2.0	1.0			
1,500			2.5	1.5			
2,000			3.5	2.0			
3,000			4.5	3.0			
4,000			6.5	4.0	1.5		
5,000				5.0	2.5		
6,000				5.5	2.5	1.5	
7,000				6.5	3.0	1.5	
8,000					3.5	2.0	
9,000					4.0	2.5	1.5
10,000					4.5	2.5	1.5
12,000					5.0	3.0	2.0
14,000					6.0	3.5	2.5
16,000					6.5	4.0	2.5
18,000						4.5	3.0
20,000						5.0	3.5

Reservoir length can be reduced by 50% when the motive medium pressure (Pm) divided by back pressure (P2) equals 2 or greater (when $P_m \div P_2 \geq 2$).

Steam Trap Discharge Capacity

— : Capacity of GT10/GT14 as steam traps ($P_1 > P_2$).
Instantaneous condensate loads above the rated trap capacity will cause the pump to cycle and therefore reduce the discharge capacity.
- - - : Minimum amount of condensate required to prevent steam leakage.

- Capacities are based on continuous discharge of condensate 11 °F below steam temperature.
- Differential pressure is the difference between inlet and outlet pressure of the trap.

CAUTION

DO NOT use this product under conditions that exceed maximum differential pressure, as condensate backup will occur!

Filling Head and Pressure

The discharge capacity is determined by the motive medium, motive medium pressure (Pm) and back pressure (P2).

Make sure that:
Discharge capacity × Correction Factor > Required Flow Rate

Motive Medium Consumption

Discharge Capacity

● Correction Factors

(For GT10 and GT14 with filling heads other than 36")

Filling Head from Grade	Inlet Check Valve Size (in)				
	GT10		GT14		
	1	1½, 2	3	2, 3	2, 3
60"	1.34	1.27	1.14	1.14	1.14
54"	1.29	1.24	1.12	1.12	1.12
48"	1.22	1.18	1.09	1.09	1.09
42"	1.13	1.11	1.05	1.05	1.05
36"	1.0	1.0	1.0	1.0	1.0
30"	0.71	0.75	0.88	0.88	0.88

NOTE:

- A check valve must be installed at both the pumped medium inlet and outlet. To achieve the above capacities with the standard GT10 or GT14 configuration, TLV CK3MG or CKF3MG check valves must be used.
- Motive medium pressure minus back pressure must be greater than 7 psi.
- A strainer must be installed at the motive medium and pumped medium inlets.

System Package Configuration

Single System Package¹⁾

Available Standard System Package Configurations

Single GT10/GT14: 29 Gallon Tank

Weight: approx. 1060 lb

Tag	Qty.	Size	Process
A1	1	1/2	Air Vent Connection
B1	1	1	Balance Line Connection to Equipment
C1	1	3	Condensate Inlet/Auxilliary Connection
C2	1	3	Condensate Inlet/Auxilliary Connection
C3	1	6	Condensate Inlet/Auxilliary Connection
C4	1	2	Pumped Condensate Outlet Connection
D1	1	1/2	Tank Drain Connection
D2	1	1/2	PowerTrap Drain Connection
L1	1	1/2	PowerTrap Level Gauge Connection
L2	1	1/2	PowerTrap Level Gauge Connection
M1	1	1	Motive Steam Inlet Connection

Discharge Capacity: see discharge capacity graph column **D** for GT10, column **H** for GT14.

NOTES:

1) Single Industrial System Package shown. See System Package Specifications table for details and alternative configuration. See next page for Standard Tank/Piping specifications. Other non-standard specifications available to meet site requirements.

Twin GT10/GT14: 50 Gallon Tank

Weight: approx. 1650 lb

Tag	Qty.	Size	Process
A1	1	1/2	Air Vent Connection
B1	1	1 1/2	Balance Line Connection to Equipment
C1	1	3	Condensate Inlet Connection
C2	1	1	Auxilliary Connection
C3	—	—	N/A
C4	2	2	Pumped Condensate Outlet Connection
D1	1	1/2	Tank Drain Connection
D2	2	1/2	PowerTrap Drain Connection
L1	2	1/2	PowerTrap Level Gauge Connection
L2	2	1/2	PowerTrap Level Gauge Connection
M1	1	1 1/2	Motive Steam Inlet Connection

Discharge Capacity: double the discharge capacity found in column **D** for GT10, column **H** for GT14.
