## Specialty Test Kits

Application-specific specialty kits are available for many parameters, including arsenic, water in oil, sulfate, glycol, and others. These kits use a variety of methods, including test strips, turbidity, and visual color changes to accomplish testing - see each kit description for further information.

Each kit includes reagents, apparatus, and instructions - all in a rugged carrying case.

Part Number	Parameter	Platform	Range	Range 2	USD Price
145400	Hardness, total - As CaCO <sub>3</sub>	Drop Count Titrator	1 - 30 CaCO <sub>3</sub>		Contact Hach
2537800	Hydrogen Sulfide - as H <sub>2</sub> S		0 - 5 mg/L H <sub>2</sub> S		Contact Hach
2822800	Arsenic, high range	Test Strip	0 - 500 ppb As	0 - 4000 ppb As	Contact Hach
225100	Sulfate - As SO <sub>4</sub> <sup>2-</sup>		50 - 200 mg/L		Contact Hach
2800000	Arsenic, low range	Test Strip	0 - 500 ppb		Contact Hach
2186400	Glycol - Ethylene glycol in oil or water		Presence or absence of glycol, 0- greater than 150 mg/L		Contact Hach
2674500	Silver-As Ag		5 - 50 ppb Ag		Contact Hach
2237300	Water-in-oil - As %		0.05 - 1 %	0 - 10 %	Contact Hach
