**Tangent EVO E5A Active loudspeaker**

The new Tangent EVO E5 Active loudspeaker offers excellent sound reproduction and flexible installation possibilities in an elegant package. It is built on the successful Tangent EVO E5 speaker, where a 5” driver unit has delivered the sounds to its fans for some time now. It differs however thanks to the addition of an integrated amplifier into each individual speaker cabinet.

Building the amp directly into the Tangent EVO E5 Active allows Tangent’s sound specialists to precisely control the shape and performance of the speaker. Losses associated with transporting an amplified signal are avoided, benefiting both your favourite music and your ears.

You can enjoy your Tangent EVO E5 Active speakers as a sweet-sounding stereo pair, or, thanks again to the amp, alone as a majestic mono speaker. Connect a couple to your flat screen TV, your iPod or similar digital music player, or even your computer, and listen in for yourself.

Furthermore, the Tangent EVO E5 Active can be interconnected, enabling you to run a string of speakers without individual cable connections to the source. A Left/Right position switch also permits each speaker to be individually adjusted for individual channel reproduction. This makes it a perfect solution for a large conference room or auditorium, where an even stereo image is to be transmitted.

For example, mount 10 Tangent EVO E5 Active speakers in a room, five on each side, set the channel selection switches accordingly, and a great stereo experience awaits. Designate a single speaker as the master speaker allows you to control the volume of all connected speakers in parallel through the accompanying remote control.

Combine a number of Tangent EVO E5 Active speakers with a Tangent table-top radio such as Tangent Cinque and an EVO E8 subwoofer, and a great-looking, great-sounding stereo system is born.

**Tangent EVO E4L loudspeakers**

SUPER-SOUNDING SPACE SAVERS...

Isn’t it amazing to see how fast flat screen TV’s have left the world of science fiction and moved into our homes? No more big picture tube televisions that needed a bracket the size of a crane to mount it on a wall, either.

But did you ever see what happens when a deep speaker is hung close to one of these TV’s? We did, and decided to do something about it. The new Tangent EVO E4L is a space-saving speaker specifically designed to be used with flat screen TV’s. The closed-box construction provides a sound so super, you’d expect it to come from a much larger solution.

Flexible mounting possibilities allow you to place the Tangent EVO E4L either along side or underneath the television. The speakers are packed individually, allowing you to purchase a pair for stereo sound and a single speaker for centre channel reproduction. Available in high-gloss black and high-gloss white.
Tangent EVO E24 centre loudspeaker

TANGENT EVO CENTRE – WHEN SOUND AND SIZE MATTERS...

The Tangent EVO E24 centre speaker has been designed to match the stunning EVO E4, E5 or E34 bookshelf speakers. Finished in the same deep, high gloss black or white, the EVO E24 looks as impressive as the other EVO’S.

As with the other EVO’S, the E24 isn’t just one of the best looking speakers in its class, but also one of the finest sounding. A soft dome tweeter and carbon effect, impressed woofer units create a fabulous sound quality that compliments a wide range of speakers in addition to the EVO’S.

For a centre speaker that truly looks as good as it sounds, the EVO E24 has it all!

CHANGING PERCEPTIONS ABOUT FLOOR SPEAKERS...

Whoever said that floor speakers had to be big, black, and boxy creations is in for a big surprise this season. Tangent is ready to reveal a yet another revolution in EVOlution: the Tangent EVO E34 floor speaker.

Standing tall at 104cm, the largest Tangent EVO speaker to date is redefining what a floor speaker should look like, how much space it should take up, and how it should sound. The Tangent EVO E34 is the top-of-the-line model within the Tangent EVO family. Its minimalist design belies the multi-faceted performance power it possesses within.

Add a pair of Tangent EVO E34 speakers to your existing audio setup. Their great performance may surprise you, too. Available in high-gloss black and high-gloss white.

Tangent EVO E45 loudspeaker

SLIM, STYLISH, AND WELL-SOUNDING SPEAKER

Tangent EVO E45 arrives as a natural extension of the successful EVO series. Tangent EVO E45 employs the same driver units as the critically-acclaimed and popular E5 speaker. Here, however, no less than four 5" bass drivers are put into service, delivering an impressive sound pressure and deeper bass than the single 5" driver found in the E5.

Flexible and multi-faceted speaker

The chic design that defines the EVO E45 allows it to fit into the majority of interior decorating themes. The outstanding power delivered by the four driver units allows the customer to use it as stereo speakers or even front channel speakers in a surround sound system. The easy electric load gives you a large freedom in selecting an amplifier for EVO E45. Describing the EVO E45 as a flexible and multi-faceted speaker therefore fits the bill well.

High-quality components

Producing the high-quality sound in the EVO E45 is helped along out by powerful magnets. This achieves full control over the glass fibre membranes used in the four 5" bass drivers. For treble effects, the same great-sounding softdome tweeter known from the rest of the EVO speaker range is used. In the first-class cross-over filter only foil capacitors and large coils are used. Tangent has combined these high-quality components to truly create a stylish and well-sounding speaker in the EVO E45.

Specifications

- System: 3-way bass reflex
- Recommended power amplifier: 10-200 Watt
- Tweeter: 25mm Softdome neodymium
- Woofer: 2 x 125mm

- Dimensions (HxWxD): 1000 x 145 x 260mm (269mm)
- Midrange: 2x125mm
- Frequency range +/- 3 dB: 45Hz-20kHz
- Sensitivity (2,83V / 1M): 88db
**Tangent EVO E8 subwoofer**

REACHING THE DEEPEST DEPTHS OF SOUND...

Great movies rely on the entire spectrum of sound: from the sharp high pitches found in glass breaking or a soprano’s song to the deep bass rumble of a rocket engine or frighteningly low roll of thunder on a stormy night. Great surround sound systems have made it possible to bring these dramatic movie effects into your home, where your favourite chair is the best seat in the house.

The new Tangent EVO E8 Subwoofer is a powerful low-frequency producer that slides almost unnoticed into your home. Unnoticed until you engage your system, that is. It reaches down into the deepest depths of sound, pulling out deep bass effects and spreading them into your viewing and listening area for your pleasure.

The closed-box construction works in perfect aural harmony with the rest of the Tangent EVO family. Visual harmony is also assured, as the design and proportions of the Tangent EVO E8 Subwoofer are perfect supplements to the rest of the Tangent EVO range. Available in high-gloss black and high-gloss white.

Tangent EVO E8 2.1 subwoofer

THE CORE OF AN ELEGANT ACTIVE SOUND SYSTEM

Tangent EVO E8 2.1 is a subwoofer with built-in stereo amplifier and remote control. It is the perfect partner for Tangent EVO E4, E4L, and E5 speakers.

HI-FI SOUND FOR YOUR FLAT SCREEN TV!
Pair a Tangent EVO E8 2.1 subwoofer with Tangent EVO E4L speakers, and experience for yourself how the sound from your flat screen is elevated to another level. Simply connect the sound from your TV directly into the EVO E8 2.1 subwoofer, add a couple of Tangent EVO E4L speakers, and enjoy the increase in audio enjoyment! Watching TV suddenly becomes a more enveloping experience.

ELEGANT STEREO SOLUTION
Tangent EVO E8 2.1 also excels together with a pair of EVO E4 or E5 loudspeakers and the range of Tangent table-top radios. Creating this combination gives you an elegant, great-sounding stereo solution, that is as much a pleasure for your eyes as it is for your ears.

HI-FI SOUND FOR DIGITAL MUSIC SOURCES
More and more people have their music stored on a computer, media player, mobile phone, or an iPod. Building an appealing stereo system around this source is accomplished easily. Just add an EVO E8 2.1 and a pair of EVO E4 or E5 speakers, and enjoy.
