

The worldwide **Conveyors** of automated garment sorting, storage & retrieval.

24 Hour Automated Dry Cleaner

Unattended Drop-Off and Pick-Up

The worldwide leader in
garment sorting technology for
dry cleaners

White Conveyor's 24 Hr. Automated Dry Cleaner (ADC) provides your customers round-the-clock service. Reduce costs and increase profits by replacing attended drop stores or expanding service to new locations.

Reduce Costs and Increase Profits While Providing Your Customers Unsurpassed Convenience

White Conveyor's Automated Dry Cleaner gives you the opportunity to expand your business without adding additional employees. New customers will love the convenience of round-the-clock service at train stations, corporate campuses, office building, apartment complexes – just about anywhere!

White's 24 Hour Automated Dry Cleaner (ADC) dramatically increases your profits while reducing costs by replacing attended drop stores or adding new locations. Expand your customer base by placing an unattended ADC at a train station, office building, corporate campus, or apartment complex. The possibilities are endless, and so are the potential profits when you put the ADC to work for you.

The ADC provides fast return on investment. You can expect 100% ROI in just 2 years. Just sit back and collect remarkable profits for many years with the ADC.

What's more, your customers will love the round-the-clock convenient service. They can drop off and pick up garments any time, day or night, on their way to work or play. There is no better way to build loyalty and new business. Major credit cards are accepted for on-site enrollment, making the system easy to use. Garments are delivered fast - the conveyor delivers multiple groupings in one cycle.

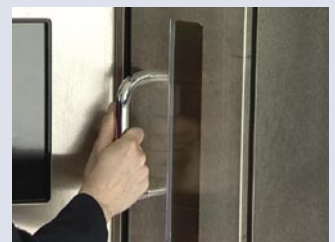

White's ADC is the perfect solution to expand your existing business, improve customer service and increase profits. Call or visit our website at www.white-conveyors.com today to learn more about the 24 hour ADC.

Easy-to-use touch screen buttons and keypad.

Printed receipts for all Credit Card and Debit Card transactions.

System delivers multiple groupings in one cycle to the secure door.
