

Fan Coils

Titus offers a full line of horizontal and vertical fan coils to fit every building design requirement. The horizontal product includes both basic and high output series, while the vertical series also includes basic and high output series, plus a stack series.

Ideally suited for installations such as hotels, motels, schools, hospitals, nursing homes, apartments, condominiums and other commercial and public buildings.

Standard fan coil features include high efficiency coils, manual air vents, removable motor/blower assemblies, and three-speed PSC motors. Sized from 200 to 2000 CFM with two- to six-row coils. Models can be ordered with additional features specific to individual requirements.

All fan coils meet ARI Standard 440 performance certifications and are constructed in compliance with ANSI/UL 1995 Standard ETL. Firewall compliant with ANSI/UL 1479.

Titus fan coil units are renowned for their precise design, rigid construction, longevity and extremely high quality standards. Titus continues to provide proven engineering with fan coils meeting the requirements of the building industry.
