INTRODUCING THE ZOELLER SEPTIC SYSTEM FILTER AND ALARM

High Water Level Alarm for Zoeller Septic Tank Filters

By combining a Zoeller Septic Tank Filter with the high water level alarm package, you can be assured of proper flow through your septic system. The high water alarm conveniently communicates when the filter is clogged, indicating that service is necessary. With this package, you protect your septic components downstream, while maintaining proper filter flow.

A Zoeller Septic Tank Filter will improve the performance of your septic system and help protect your lateral field from clogging. The filter is designed to limit the size of particulate that can pass out of the septic tank. The Zoeller filter will pass no solid larger than one-sixteenth inch (1/16"). By preventing solids from reaching the lateral lines, the life of the system can be increased and expensive repair bills may be avoided.

The Zoeller filter should be cleaned each time the septic tank is pumped or as needed. More frequent cleaning will not hurt the filter and could even improve the performance of your septic tank. For installations that exceed the design flow rate of one filter, use a manifold type arrangement to add as many filters as required. To clean, simply withdraw the element filter and rinse the solids back into the septic tank.

Products may not be exactly as pictured.

"A-PAK II" OUTDOOR ALARM SYSTEM
• NEMA 4X thermoplastic alarm panel.
• Horn and light warn of high liquid levels.
• Auxiliary alarm contacts for remote circuit.
• Entire unit (alarm panel & float switch) UL Listed for water & sewage and CSA certified.
• 15' Float Switch.

Covered by US Patent Numbers 6,136,190; 6,331,247 and 6,495,040

Note: All variable level float switches in this section are mechanically activated and do not contain mercury.

Part Number	Description
10-0623	A-Pak Alarm Systems
5000-0007	Deluxe/Commercial Septic Tank Effluent Filter
170-0078	"WW" Residential Effluent Filter
