

ELMO

Envision beauty in motion

**P30**  
Visual Presenter

# P30

## Visual Presenter

The P30 is ideal for a diverse range of presentation applications – from business and research to industry and education.

Elmo's state-of-the-art technologies deliver both moving and still images with exceptional beauty and clarity.

### **85** 850,000-pixel progressive scan CCD camera

The P30's advanced camera system integrates an 850,000-pixel progressive scan CCD pickup that's capable of capturing not only the finest details of images – but moving objects as well! Combined with true XGA (1,024 x 768) resolution, the P30 reproduces three-dimensional objects and subtle shades of color with unsurpassed precision.

### **Capture crisp, live images**

Now you can convey presentations more effectively and inspire your audience with vivid moving images on the big screen. With a frame rate of 20 fps, the P30 smoothly captures and reproduces moving images that can either be presented live or saved to your PC for future use.

### **Free Angle** Flexible free-angle camera arm and lamp

The P30's camera head can be rotated freely to capture objects at precise angles, making it easy to present objects with the exact look you want. And with the free-angle lamp, you also have all the flexibility you need to set ideal lighting conditions.

### **60X Zoom** 60X zoom

Focus in on the intricate details of your presentation with the 4X digital zoom function that can enlarge images up to 60 times when combined with the 15X optical zoom lens.

### **See how lightweight and compact the P30 is**

Weighing in at just 10.4 lbs – half the weight of standard models – and measuring approximately 19 inches, the P30 is lightweight and compact enough to comfortably hand carry to any location.

# Lightweight and Compact

# Crystal Clear Expression

**DVI** **Versatile output**

The P30's versatile output connections bring you greater presentation freedom and flexibility. The DVI output lets you transfer high-quality video data without any loss of image quality, while an analog RGB output makes it easy to connect the P30 to an LCD projector or a PC monitor for true XGA-resolution display.

**User-friendly interface**

For the ultimate in easy and intuitive operation, the P30 incorporates a Jog Dial zoom control for quick zoom adjustments as well as an OPT (optional) button that gives you the flexibility to assign a frequently used function to the front panel.

Jog Dial

Optional button

# Quick and easy PC file transferring opens up a new world of possibilities.

With the convenience of bundled software, creating outstanding PC presentations has never been easier.

## **Bundled Software** "Image Mate for Presentation"

- Annotation tools let you draw lines (freehand or straight) in a variety of colors to highlight and enhance screen images, right from your PC.
- Split Screen gives you a platform for comparing live video to stored images — side by side for greater visual impact.

Annotation

## **Bundled Software** "Image Mate for Movie Creation"

- Moving images can be easily saved to a PC for future use as analog RGB 850,000-pixel video files. Since files are saved in common AVI or WMV format, they can be played back effectively using Windows Media® Player\*.

\* AVI/WMV file playback is available with Windows Media Player versions 6.4 to 10.

Split Screen function

Save video files

## **TWAIN Driver** TWAIN driver

With TWAIN compatibility, the P30 brings you the versatility to import saved image files

to commercially available photo retouching software.

# Make effective presentations – even without a PC!

## **SD Card** SD Memory Card-ready

Presentation data, such as PowerPoint® files and digital camera images, previously saved to an SD Memory Card (sold separately) is ready to go even without a PC. Thanks to the P30's Image Mate for Presentation software, you can output SD Memory Card data through the P30 for use in slideshow

presentations. Now with the flexibility of SD Memory Card storage, which can hold up to 2,048 image files, as well as conventional PC and camera images, the P30 provides a new dimension of presentation possibilities.

## **Grid** Split screen and slideshow display

Images previously saved to an SD Memory Card can be conveniently displayed as split screens (9 or 16 splits) or slideshows, enabling quick file searches and smooth operation.

## Other key features

### **Setting Storage** State presetting

Instead of having to readjust the machine every time you use it, the P30 lets you store up to eight frequently used settings such as iris selection, white balance and lamp on/off. With quick and easy access to settings, your preferred adjustments are always ready to go.

### **Slide Shooting Adapter**

Even conventional slides are easily presented using the P30's included Slide Shooting Adapter. (See the back page.)

### **A3-Size** A3-size shooting area

With a large A3-size shooting area, the P30 captures a wider image field compared to the conventional B4 size.

### **Cord cover**

Cables are always neat and tidy thanks to the rear panel cord cover.

Note: The cord cover pictured here is made transparent for explanatory purposes.

# P30 Specifications

Model		P30	
Camera	Image pickup device	1/3" progressive scan CCD	
	Total pixels	1,077 (H) x 788 (V), 850,000 pixels	
	Effective pixels	1,034 (H) x 779 (V)	
	Frame rate	20 fps	
	Resolution	600 (H) x 600 (V) TV lines	
	RGB output	450 (H) TV lines	
	Video output	450 (H) TV lines	
Optics	Zoom	Powered [with variable speed function ], 15X optical, 4X digital	
	Lens	F2.8, f=4.7 to 70.5 mm	
	Shooting area	Max. 16" x 12" (405 x 303 mm), min. 1 1/8" x 7/8" (30 x 23 mm)	
	Focus	Auto/Manual (powered)	
	Iris	Auto (with level adjustment)/Manual	
Functions	White balance	Full-auto/One-push/Manual	
	Negative/positive conversion	Provided	
	Aperture enhancement	Provided	
	Text mode	Provided	
	Edge enhancement	Provided	
	Color/B&W selection	Provided	
	Pause mode	Provided	
	Digital magnification	Provided (2X, 4X, Scroll )	
	Gamma adjustment	Provided	
	OSD (on-screen display)	Provided	
	Slideshow	Provided (SD Memory Card image)	
	Split screen	Provided (SD Memory Card image, 9-split, 16-split)	
	Image save	Provided (onto SD Memory Card )	
	Image rotation	Provided (0°, 180°)	
	State presetting	Up to 8 user settings	
Sync. system	Internal		
Input/output	Internal selection	Int./RGB1	
	Analog RGB output	XGA (1,024 x 768 @60 Hz), VESA	
	Video output	Composite, S-video	
	RGB input	Provided	
	DVI output	Provided	
PC interface	RS-232C port	Provided	
	USB port	Provided	
Memory card	SD Memory Card slot	Provided	
Lighting	Upper lighting unit	Provided (twin fluorescent lamp)	
Others	Accessories	I/R remote control, Slide Shooting Adapter, cables, etc.	
	Dimensions	Set up	14 7/8" x 19" x 23" (377 x 482 x 582 mm)
		Folded	14 7/8" x 19" x 7 1/8" (377 x 482 x 180 mm)
	Weight	10.4 lbs (4.7 kg)	
	Application software	Image Mate for Presentation, Image Mate for Movie Creation, TWAIN driver [for Windows® 2000 (SP4 or later), Windows® XP (SP2 or later)]	
	Power source	AC 100 to 240V, 50/60 Hz	

H: horizontal, V: vertical
