

ARTSCREEN SYSTEMS

ArtScreen / Motorized Art System

ArtScreen

ArtScreen transforms an LCD, Plasma TV or video projection screen into a work of art. Inside a beautiful hardwood frame, the artwork ascends or descends with the touch of a remote. When the screen or television is not in use, the digital art-on-canvas image of your choosing is displayed within the frame; when your artwork is retracted, the video display is visible for viewing.

A vast array of frame styles, liners, and artwork choices for reproduction can be viewed at the Vutec website, www.vutec.com/artscreen. In addition, custom artwork and personalized photographs can be reproduced to create an individualized or more glamorous work of art. Recessed and surface mount versions are available to compliment any interior design or décor.

ArtScreen is available for video displays from 32 inches to over 65 inches. Custom sizes can also be accommodated.

Features

- Standard plasma/lcd display sizes from 32" and up
- Also available in larger front and rear projection screen formats
- Recessed or surface versions available
- Designed for ease of installation
- Large selection of Giclée fine art prints, frames, and liners
- Client's custom art or photographs can be duplicated with authorized release
