- Includes RCA and S-Video jacks for input from camcorder, gaming system and speakers
- Supports NTSC and PAL television standards
- Includes converter stand, 2 AAA batteries, AC/DC adapter and user manual

203-250

Product Description

The Steren TV-to-PC converter/tuner can turn an ordinary personal computer into a virtual TV set when one is not practical or available. Stylishly designed for optimum space savings in cramped areas such as dormitories or offices, this device is perfect for viewing TV programming, videos, games and other multimedia on a PC. The product transfers a composite video or S-Video signal from an input source—such as off-air antenna or cable TV—into a computer's VGA signal. It also features RCA and S-Video jacks for connections to speakers, DVD players, VCRs, camcorders and game systems. Thanks to its plug-and-play functionality, there's no need to install a separate video card or software. The easy-to-use, full-function remote control accesses TV or PC mode, the TV channel, on-screen display, volume/mute functions and video adjustments, just like the remote for a TV set.
