

Remanufactured Semi-Hermetic Compressors

Liebert Remanufactured Semi-Hermetic Compressors will reduce your compressor cost as compared to a new compressor, because some of the original “high cost” parts such as the compressor body and cylinder heads can be reused.

Liebert Remanufactured Semi-Hermetic Compressors are remanufactured by the **ORIGINAL COMPRESSOR MANUFACTURER**, and they are higher quality and reliability than other remanufactured compressors that may be refurbished by another 3rd party organization.

Compressor remanufactured to latest engineering specifications

Key Features

- Critical components not meeting specifications are replaced with “new” parts.
- Cylinder walls honed and crankshaft re-machined and polished.
- Valve seats machined and new reed valves installed.
- Motor windings tested: dielectric strength at 1000 volts (checks for electrical breakdown) and two times nameplate voltage.
- Run-in performance test is conducted on each compressor.
- Pressure tested to UL requirements to ensure product safety.
- Warranty: 12 Months standard. Optional extended warranty available.
