

Battery Replacement

The Battery Installation Experts

If your valve regulated lead acid (VRLA) batteries have been in service for four or more years, it may be time to schedule an evaluation of their condition to ensure that your UPS system will provide the protection you require.

When a power outage occurs, even a single bad cell in a string of batteries could compromise your entire backup system and leave you without protection. Proactively replacing your batteries will help to keep your system running up to specifications and minimize the risk of downtime to your business operations.

Liebert Services offers full-string replacement of battery systems, including expert installation of new cells and proper recycling of spent batteries.

When Do Batteries Need To Be Replaced?

Service life of a battery is limited and depends on many factors, including age, usage, environment and maintenance. IEEE standards recommend replacing a battery at the time its capacity drops below 80%.

A typical VRLA battery may start to lose capacity or fail within 3-5 years. Proactively replacing your batteries will help to keep your system running up to specifications and minimize the risk of downtime to your business operations.

Why Trust Battery Replacement To Anyone Else?

Liebert Services offers a complete range of replacement services to handle all of your new battery needs. In fact, we replaced several thousand battery strings and in excess of 178,000 batteries last year.

Our factory-trained battery specialists are experts in all aspects of battery service and replacement. Replacement and installation services include both vented lead acid (VLA or “flooded”) and VRLA batteries.

We provide full compliance with all manufacturers’ and IEEE standards for removal of old batteries and installation of new cells, including the handling of all environmental/regulatory aspects of battery recycling.

Liebert Services Is Your Best Choice For Battery Replacement

Liebert Services offers “one-source” convenience for all your UPS and battery services. We deliver a level of trust and credibility that many third-party service providers simply cannot guarantee.

Our customer engineers are “up to date” with product training and field change notices on Liebert equipment. We can also manage the warranty process for you.

You can count on us to know everything there is to know about your Liebert power system and its batteries.

And, Liebert stocks nearly \$1 million in battery inventory across our three warehouse locations.
