

ABT Vertical ElectriMask

The ABT Trapdoor Vertical ElectriMask is designed to provide the flexibility of dual aspect ratios

ABT Vertical ElectriMask

The ABT Trapdoor Vertical Electrimask is designed to provide the flexibility of dual aspect ratios combined with the convenience of a retractable screen. This innovative line of variable-masking models features a motorized trap door, which keeps the screen hidden when not in use.

The ABT Trapdoor Vertical Electrimask is available with variety of Stewart's front or rear projection materials. Our exclusive Tab-Guy^a tensioning system ensures a smooth and completely flat screen surface. Matte black over-scan borders provide a perfectly masked image area.

Microperf X2 and Cinemaperf are available when acoustic transparency is required (acoustically transparent panels are available upon request).

FEATURES

- Constant height, variable width with dual-aspect ratio capabilities
- Electronically controlled screen system, trapdoor, and vertical masking panels
- Native HDTV (1.78:1/16:9) or Cinemascope (2.35:1) image area
