

SUPEREIGHT® HEAD PROTECTION

Fibre-Metal's sophisticated SUPEREIGHT Impact Energy Control System raises protective performance to a new level. On impact, the smooth shell flexes, absorbing and dissipating some impact energy. The reduced impact energy is passed to the suspension system at eight scientifically determined points around the cap, thus dispersing the energy over a greater area of the head, reducing the risk of failure at any one point.

During everyday wear, SUPEREIGHT's low center of gravity, multiple adjustments, and choice of full sweatband, ratchet headband, or patented SWINGSTRAP™ provides the right fit and feel for maximum comfort. Most Fibre-Metal protective hats and caps are SEI certified. All come fully assembled.

E-2RW SOA SPIRIT OF AMERICA HARD HAT

SUPEREIGHT protection with striking full graphic patriotic design. Advanced graphics will not peel, chip or fade. Also available in full brim protective hat style.
