LubeRite™

www.luberite.net

Ideal for anyone using lube oils, hydraulic oils, motor oils, coolants

Durable, easy-to-use LubeRite™ storage and dispensing containers protect against lubricant contamination to reduce machinery downtime. HDPE lids feature a fully sealed system which keep dirt and dust out and reduce dangerous and costly spills. Lid includes 8 colored rubber bands for content identification. Unique features include:

- Anti-fatigue on/off breather vent that provides smooth-flow pouring and offers a full five-finger grip while topping off.
- Quick-fill port which minimizes exposure to airborne contaminants ...no need to remove the entire lid during refilling.
- Accessory port that accepts quick disconnect couplings and is ideal for oil analysis

HDPE translucent drums have graduated markings to measure liquid level. Square, stable shape makes the most of available space. Adhesive-backed drum pouch comes with colored cards which match colored lid bands for "No Mistake" fluid identification.

Mix & match components to fit your specific application: 3 container sizes, 3 pour lids, 1 pump lid, and accessory pump or extension hoses for easier dispensing into awkward places.

Drums, lids and accessories sold separately. Easy mix 'n match system minimizes inventory and lets you create a container to fit your specific need.

Simple color I.D. system: Every drum comes with a standard pouch and four double sided color cards for eight color choices. Every lid comes with eight color bands.
