

When only the best will do! A deluxe hybrid cigarette butt receptacle that combines an upscale, polymer exterior with a fire-safe, steel interior

Safely dispose of cigarette butts with SteelCore<sup>™</sup> Smokers Cease-Fire<sup>®</sup>. Polymer exterior and steel inner structure provides superior safety features and unmatched durability in an upscale housing. Handsome styling makes it ideal for entryways, break areas or anywhere people smoke outside of office buildings and retail locations.

Thousands of cigarette butts are safely contained in a fire resistant, galvanized steel urn utilizing Cease-Fire<sup>®</sup> technology to automatically extinguish butts... no need to snuff them out. Steel urn twists off at neck to empty contents for reuse. Or for complete "no-mess" cleaning, simply discard and purchase optional replacement urn.

Exclusive water ballast provides 40 lbs. (18kg) of additional stability - no need to buy and add messy sand. For greater protection against theft, an optional concrete anchor kit is available. Rain protected dual-sided drop hole is sized to discourage unwanted trash. Elegant aluminum panel (both front and back) offers visual contrast and clear identification for cigarette butt use. Durable, long lasting polypropylene housing won't rust, dent or crack. Top self-locates into sturdy, impact resistant polyethylene base and is secured with hand-tightened screws. Top lifts off easily for maintenance.

Upscale design suits any locale

Clear identification for cigarette butts

Rain protected dual-sided opening discourages trash

Outside polymer housing with aluminum panel is easy to clean, long lasting. Backside is a mirror image of front.

Stays looking nice - no ugly drip marks from tar and nicotine buildup

Easy to use; simply drop lit cigarette into identified opening

Fade resistant, rustproof polypropylene exterior maintains appearance, won't rust, chip or dent ....

Urn opens with simple twist-off at the neck tube for easy emptying

Disposable option: For ultimate "no mess" cleaning simply throw away and replace steel urn

Large capacity, fire safe, non-melting steel urn  $\cdot$  captures thousands of butts

- Self-extinguishing Cease-Fire technology
- Exclusive water ballast system provides an additional 40 lbs (18kg) of weight for optimum stability. Optionally, may be filled with sand if desired.
- Impact resistant, black polyethylene base stands up to abuse
- ·· Three molded in "feet" provide greater stability
- ··· Optional anchor system deters theft
