

Darley Heat Exchanger

Can be installed in the engine cooling system of any pumper. Instead of going directly into the engine cooling system, mixing with the anti-freeze solution, diluting it and then going out through the radiator overflow pipe, the flow of cool water from the pump bypasses through the condenser coils in the Heat Exchanger. The liquid in the cooling system circulates around the condenser coils and is completely cooled. Prevents loss of anti-freeze solution. 24" long. *Ship. wt. 10 lbs.*

Vernier Throttle Control

Easily installed throttle designed for apparatus. Provides both instant and micro meter fine adjustment together with a locking action which is not affected by vibration while pumping. The instant adjustment is conveniently made by a push-pull movement of the knob after a slight pressure is applied on the thumb button. The fine or Vernier adjustment is made by simply turning the same knob. Throttles are shipped complete, ready-to-install in 15' or 20' lengths. *Ship. wt. 5 lbs.*

Magnesium Anode Pole

Attracts Rust & Corrosion

Sacrificial catalytic action of these magnesium anodes can help to prevent rust or corrosion from attacking your booster tank. Threaded mounting plate suspends the 3/4"x45" solid anode in the tank water. Bar is easily cut to fit tanks less than 44" deep. When the expendable anode dissolves, it is merely replaced with a new one. Comes with flange and gasket. *Ship. wt. 3 lbs.*

Darley Brass Valve

One-piece brass valve that withstands operating pressures to 3,000 psi. Needle type for accurate reading of pressure gauges. Opens completely in five turns. For use with pressure regulator, bypass, heat exchanger or in any location where a water control valve is necessary. 1/8" iron pipe tab. *Ship. wt. 1 lb.*
