**REINFORCED
BARRICADE
TAPE**

For those times when you need a barricade tape with extra strength, versatility and durability, try our Reinforced Barricade Tape as an alternative to standard tape. Reinforced tape is available for tapes with **black legends** only, and printed on **red or yellow** tape. This heavy duty tape can be stapled, nailed or tied into place.

To order Reinforced Barricade Tape simply add "-R" to the part number of the stock legends listed at left.

EXAMPLE - A roll of CAUTION ACID HAZARD Reinforced Barricade Tape is TBT-1-R

DETECTABLE UNDERGROUND TAPE

All legends are available in 2", 3" and 6" widths x 1000 ft. long. PRINTED BLACK ON SOLID COLOR BACKGROUND.

Conforms to the following specifications:

- NTSB-PSS-73-1
- GSA Public Buildings Service Guide
- American Gas Association 72-D-56
- API RP 1109
- OSHA 1926-956 (c) (1)
- APWA Uniform Color Code
- DOT Office of Pipeline Safety USAS B31.8
- Federal Gas Safety Regulations S 192-321 (e)

Avoid the problem of costly dig-ins to locate buried, non-metallic cables and pipelines with our Detectable Underground Tape. Providing you with double protection, this tape is easily located with any industrial grade, non-ferrous metal detector before you dig, while its highly visible colors make it easy to locate after the dig has begun.

To install, simply place a length of tape in the excavated ditch above the installation. The tape should then be placed 6" to 12" below grade. Installation of Detectable Underground Tape should be supervised by a professional or authority concerned with the proper use of the product.

Cat. #	Legend	Color
DUT-01	CAUTION - Buried Electric Line Below	R
DUT-02	CAUTION - Buried Gas Line Below	Y
DUT-03	CAUTION - Buried Pipeline Below	Y
