

HYDRA-RAM Hydraulic Emergency Entry Tool

10,000 pounds of force is presented by 138 lbs. of pumping to acquire $\frac{3}{4}$ " stroke to a maximum thrust opening of 4 inches. The Hydra-Ram can be placed in any position, even upside down, without any effect on its operation; this is a first in hydraulics. Because of its unique size, 13" and only 12 lbs., it can be slung or carried on your belt. The entire unit can be controlled by one user alone, making it truly a one-person operation tool. No hoses, tanks or pumps so there is no maintenance or leaking fluid. Jaws are made of stainless steel with 220,000 psi tensile strength. Special finger grips give a non-slip holding surface. *Ship. wt. 15 lbs.*

Includes:

- ▶ A. HYDRA-RAM tool
- ▶ B. Cordura® carrying bag
- ▶ C. Mallet
- ▶ D. Carrying sling

AE097 HYDRA-RAM Hydraulic Emergency Entry Tool \$1,624.95

Percussive Rescue Kit

You'll feel the difference as soon as you hold it. This slam and ram tool exerts a striking force as you've never seen. You'll hear the solid "thud" as the slam bar strikes one of the six assorted tool bits. The ram travels 16" for maximum impact. Whether you're breaking a brick/block wall or pounding through locks and latches, this tool makes you more efficient. With the slam and ram feature, there is no deflection of pounding force. All of the energy is used to strike effective, penetrating blows by a single person. When hydraulic, electric and pneumatic power is gone or unavailable, you'll still be punching and pounding with this rescue tool. *Ship. wt. 29 lbs.*

Use the right tool for the right job and let the tool do the work

Complete Kit Includes:

- ▶ Carrying bag
- ▶ Lockbreaker claw
- ▶ Metal cutting claw
- ▶ Bull point
- ▶ Chisel
- ▶ Wide chisel
- ▶ Percussive tool bar

16" open

- E. Non-Slip Handle

Darley Ram Jammers For Vehicle Extrication

When doing a dash roll-up, place the Ram Jammers against the B-posts on each side of the vehicle. Then, instead of only getting one push with the medium hydraulic rams, Ram Jammers give you a secure base to make a second and then a third push for the "Maximum Dash Roll-Up." This will give you a large amount of room in the front of the patient, making it easier to apply spinal immobilization devices. They also absorb the force of the rams to prevent fractures at the B-post. *Ship. wt. 25 lbs.*

Provides secure base
