

Transfer Safety Cans

Safe and Economical

Designed for carrying flammable liquids to be poured into containers with wider openings. Heavy-duty premium-coated steel construction protects can against abrasion and rough use; plus a state-of-the-art powder coat paint finish resists solvents, acids and alkalies while minimizing the effects of corrosion and humidity. This style is economically designed with a single spout from which you fill and pour. One gallon model features fixed handle with trigger release cap for filling and pouring. Two and five-gallon models feature a swinging handle for easy handling of 60 lbs. plus loads. *Ship. wt. 8 lbs.*

- A. Positive Pressure Release:** Spring-mounted relief vent mechanism automatically releases pressure when it reaches 5 psi to protect against explosion or rupture.
- B. Leakproof Closure:** Long-life cork gaskets are impervious to virtually all liquids and maintain the high degree of flexibility you need for a safe, tight seal.

- ▶ Type I safety can
- ▶ High-gloss protective finish

2 and 5-Gallon

D89802	One-Gallon Transfer Safety Can	\$45.95
D89803	Two-Gallon Transfer Safety Can	\$46.95
D89804	Five-Gallon Transfer Safety Can	\$48.95

Dual Opening Transfer Cans

These Type II cans have two openings, one for pouring, one for filling. They feature a built-in, 9" long flexible metal hose ideal for smooth, accurate, spill-free pouring into small openings like those you might find in bottles, plunger cans and small engines. A rear opening permits convenient filling.

Ship. wt. 9 lbs.

5/8" hose
